Gyanasarathi.com Copy Rewrite: SEO and GEO

Oct 19, 2026 · @Gyan

Read this first

We rewrote the copy for all 39 blocks across the 7 pages of gyanasarathi.com. Each block below shows a screenshot of the live section first, then the 1:1 replacement copy. Fix the seven issues in this table before or alongside the copy. Today, Google can index only the home page, and AI assistants such as ChatGPT, Claude and Perplexity can read none of the site.

#	Issue	What we found on 19 Oct 2026	Fix
1	Inner pages return 404	/about, /analytics, /ai-lab, /alpha, /research and /contact return HTTP 404 when opened directly, and so do /robots.txt and /sitemap.xml. The pages only load after a click from Home.	Add the SPA fallback rule in the Developer checklist, then prerender every route.
2	The HTML is empty	Home's HTML is 480 bytes: one empty root div that JavaScript fills in. Major AI crawlers do not run JavaScript (Vercel, Dec 2024), so they see a blank page.	Prerender or server-render each route so the copy in this doc ships in the HTML.
3	No page metadata	Every page's title tag is "gayan-website". There is no meta description, canonical, Open Graph tag or JSON-LD.	Use the title and meta description in each page's hero block, plus the JSON-LD section.
4	Brand spelled three ways	Domain: gyanasarathi.com. Copy: GyanSarathi and GYANSARATHI. Email: support@gayan-sarathi.com.	Use "Gyanasarathi" everywhere and move email to an @gyanasarathi.com address.

#	Issue	What we found on 19 Oct 2026	Fix
5	Template leftovers	The footer on all 7 pages reads "Join us as we redefine global payments". Home shows 8 testimonials with stock-style names.	Replace the footer (Home, block 9). Publish only real quotes used with permission (FTC rule, in force since 21 Oct 2024).
6	Conflicting numbers	Capital: $2.5B+ and $4.2B. Accuracy: 90%, 99% and 99.8%. About shows "+24.8% Above Benchmark" and "$14.2M Year to Date".	One verified figure per metric, used the same way everywhere.
7	Heading structure	Home has 3 H1 tags (wordmark, headline, footer logo); every inner page has 2.	One H1 per page: the headline. The wordmark and footer logo become plain text.

How to read each block:

- **Screenshot:** the live block, captured 19 Oct 2026 at desktop width.
- **Table:** Element (as it appears on screen), Live (current text), New (paste as written), Why.
- **Keep** in the New column means the live copy already works.
- **Length:** new copy stays close to the live character count so the layout holds; the Why column flags any line that runs longer.
- **[confirm]** marks a number or fact only you can verify. Publish it once checked.
- **Page wrap-up:** each page ends with its answer capsule (a 40 to 50 word passage written for AI answers), then its schema and internal links.

Sitewide rules

Describe Gyanasarathi the same way on every page, in schema and on LinkedIn. Search engines and AI models then file one set of facts under one name. Every description opens with the first sentence below; longer versions, such as the answer capsules, add to it but never reword it:

> Gyanasarathi is an India-based financial modeling and agentic AI firm. It builds institutional-grade commercial real estate underwriting, DCF and LP/GP waterfall models, and AI agents that automate financial analysis for investment teams worldwide.

Topic	Use	Avoid
Brand name	Gyanasarathi, typed this way in the HTML; CSS sets any capitals	GyanSarathi, GYANSARATHI, Gyan Sarathi
Founder	Gyan [surname], Founder	GP, which private equity readers take to mean general partner
Nav label	About	About GP
Location	Hubs in India, clients worldwide	City names; "USA, Europe, Middle East and Australia"
Email	One monitored address @gyanasarathi.com [confirm]	support@gayan-sarathi.com
Private AI	"private AI model" first; "sovereign" only as a descriptor	"Sovereign AI" alone, which searchers use for national AI infrastructure
Call to action	Book a Strategy Call as the primary CTA on every page; AI Lab and Proprietary Alpha keep one named secondary CTA each	Strategy Session, Strategic Call, Consultation Call
Response time	Two business hours [confirm], with the time zone stated once on Contact, for example IST, Monday to Friday	"Two hours" on one line and "two business hours" on the next
Claims	Defined, checkable facts	Guarantee, world-class, transformative, superhuman, bleeding edge

Proof points the copy draws on. Each number appears in exactly one form across the site:

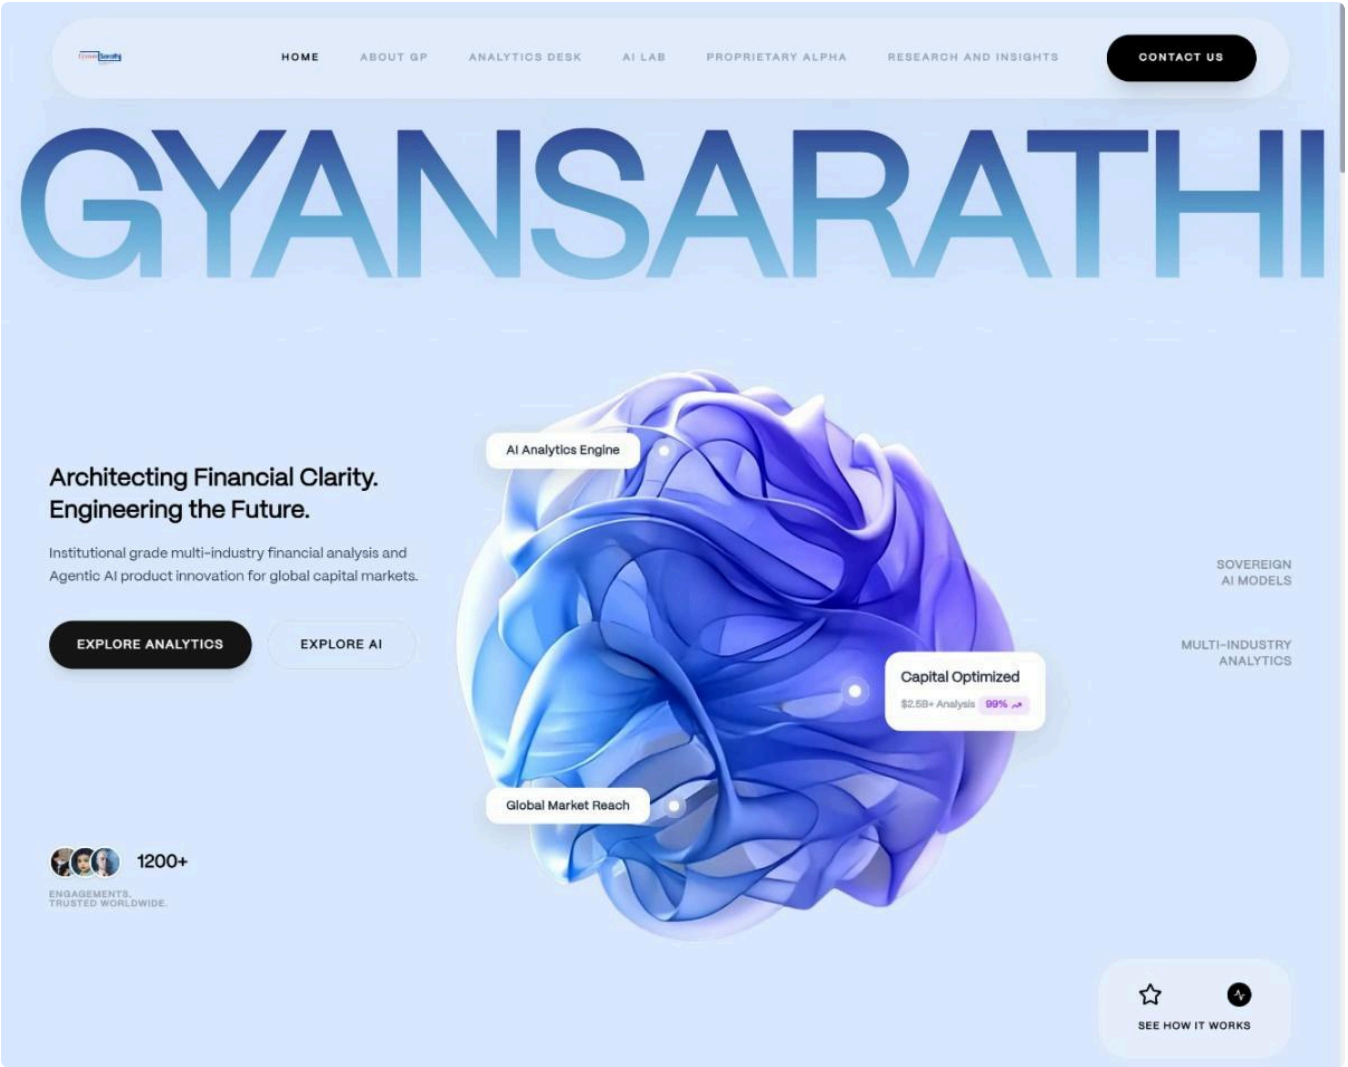

Proof point	Source
7+ years of institutional commercial real estate underwriting	Founder background
7 asset classes: industrial, office, retail, multifamily, hospitality, medical office, mixed-use	Founder background
Argus Enterprise, Excel DCF and LP/GP waterfall models	Founder background
MBA in Finance and Business Analytics	Founder background
1,200+ engagements	Live site [confirm]
$2.5B+ in transactions underwritten	Live site [confirm]; replaces $4.2B
5 AI product lines	Live AI Lab page
Client owns its model, outputs and IP	Live Proprietary Alpha page

Keywords in each hero block were chosen by search intent, not measured volume. Validate them in Google Search Console once the pages are indexable.

Home page (/)

Home carries the entity definition. Its H1 and first paragraph now name the two services buyers search for: real estate financial modeling and agentic AI.

Home 1. Hero

Block: Hero: wordmark, headline, subheadline, two buttons, social proof and floating badges.

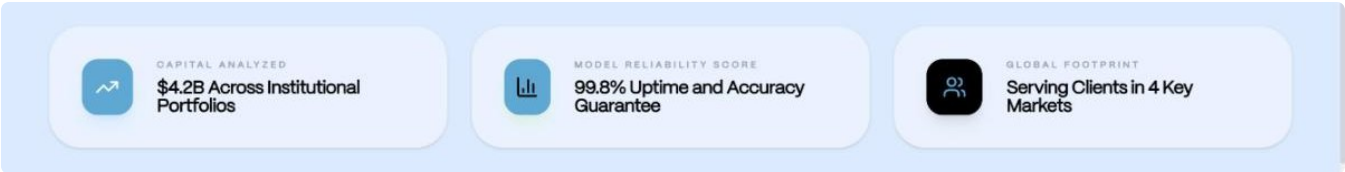

SEO metadata

- Primary keyword: CRE financial modeling and agentic AI
- Secondary keywords: commercial real estate underwriting, agentic AI for finance, LP/GP waterfall modeling, financial workflow automation
- Title tag (52 characters): CRE Financial Modeling and Agentic AI | Gyanasarathi
- Meta description (144 characters): Institutional-grade CRE underwriting, DCF and waterfall models, plus AI agents that automate financial analysis. Book a 30-minute strategy call.

Element	Live	New	Why
Wordmark (H1 today)	GYANSARATHI	GYANASARATHI	Matches the domain and logo. Make it a div, not an H1; 12 letters need about 8% smaller type. Type it as Gyanasarathi; CSS sets the capitals.
Floating label 1	AI Analytics Engine	Agentic AI Workflows	Names a service buyers search for.
Floating label 2	Global Market Reach	Underwriting Models	Swaps a vague claim for the core service.
Badge title	Capital Optimized	Capital Modeled	Describes the work, not an outcome we cannot show.
Badge figure	$2.5B+ Analysis	$2.5B+ underwritten [confirm]	Same figure as the metrics bar; 4 characters longer, so check the badge width.
Badge chip	99%	Remove the chip	The 99% has no defined metric behind it.
Headline (the only H1)	Architecting Financial Clarity. Engineering the Future.	Real Estate Financial Models. Accelerated by Agentic AI.	Names both core services and keeps the two-sentence rhythm; /analytics owns the service query.

Element	Live	New	Why
Subheadline	Institutional grade multi-industry financial analysis and Agentic AI product innovation for global capital markets.	Institutional-grade CRE and infrastructure underwriting, DCF and waterfall models, with AI agents that automate the work.	Names the models buyers search for and what the AI does.
Button 1	EXPLORE ANALYTICS	MODELING SERVICES	Descriptive anchor text for /analytics, same length.
Button 2	EXPLORE AI	AGENTIC AI	Keyword anchor text for /ai-lab, same length.
Social proof figure	1200+	1,200+ [confirm]	A thousands separator reads as a counted number.
Social proof label	ENGAGEMENTS. TRUSTED WORLDWIDE.	ENGAGEMENTS FOR CLIENTS WORLDWIDE.	States the fact once, without the vague "trusted".
Side label 1	SOVEREIGN AI MODELS	PRIVATE AI MODELS	The term buyers use (see Sitewide rules).
Side label 2	MULTI-INDUSTRY ANALYTICS	REAL ASSET ANALYTICS	Points to the primary niche.
Button 3	SEE HOW IT WORKS	Keep	Clear as is.

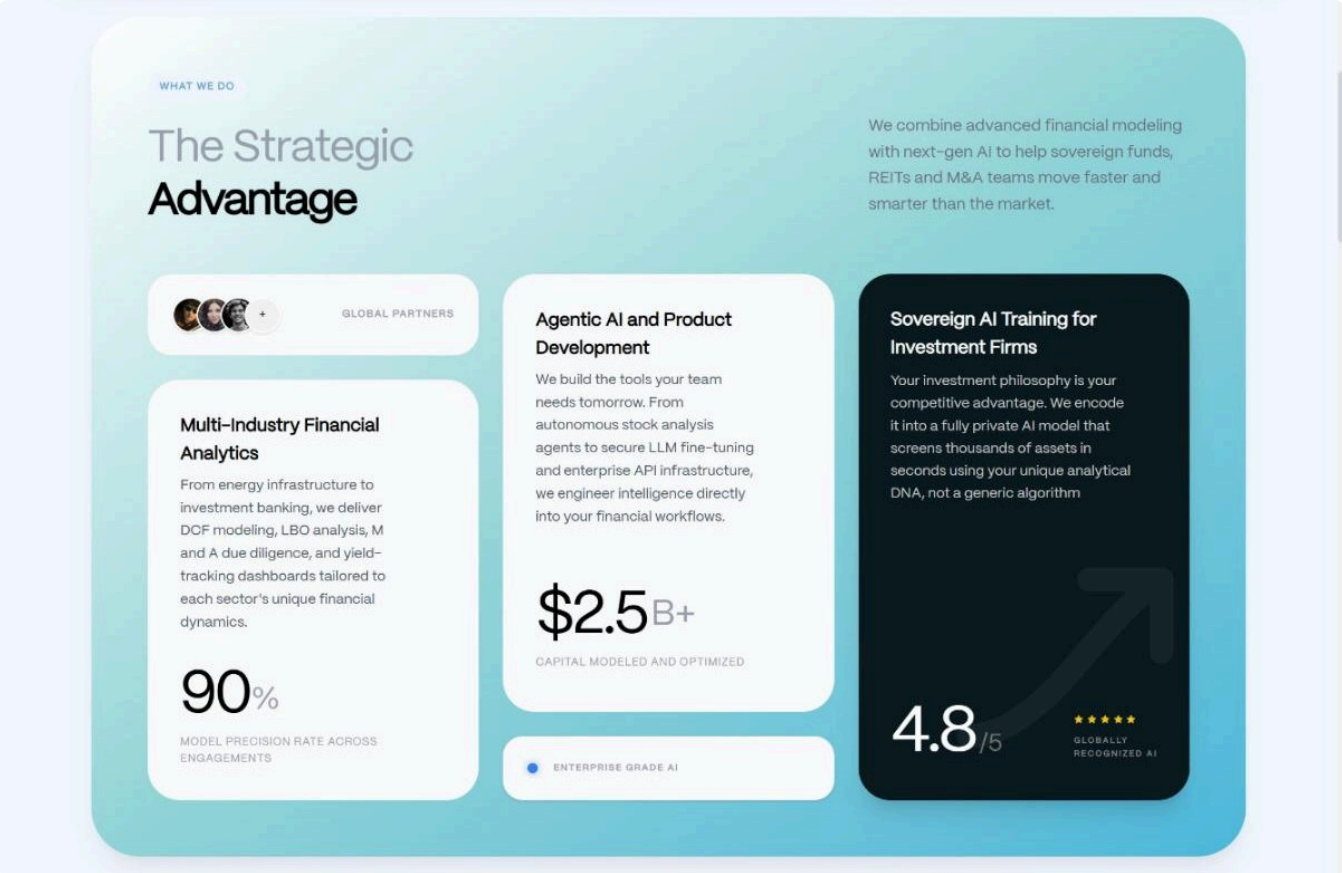

Home 2. Metrics bar

Block: Metrics bar: three KPI cards under the hero.

Element	Live	New	Why
Card 1 label	CAPITAL ANALYZED	CAPITAL MODELED	Matches the hero badge wording.
Card 1 value	$4.2B Across Institutional Portfolios	$2.5B+ in Transactions Underwritten [confirm]	The site shows both $2.5B+ and $4.2B; keep one verified figure.
Card 2 label	MODEL RELIABILITY SCORE	FOUNDER TRACK RECORD	The years are the founder's, so the label says so.
Card 2 value	99.8% Uptime and Accuracy Guarantee	7+ Years of CRE Underwriting	A guarantee invites liability; years of practice can be checked.
Card 3 label	GLOBAL FOOTPRINT	DELIVERY MODEL	Introduces where and how the work happens.
Card 3 value	Serving Clients in 4 Key Markets	India-Based Team, Clients Worldwide	Follows the location rule.

Home 3. The Strategic Advantage

Block: 3-column service grid with a metric in each card.

Element	Live	New	Why
Eyebrow	WHAT WE DO	Keep	Clear as is.
H2, line 1	The Strategic	Financial Modeling	Puts the core service in an H2.
H2, line 2	Advantage	Meets Agentic AI	Adds the second core term; both lines still fit the left column at the current size.

Element	Live	New	Why
Intro	We combine advanced financial modeling with next-gen AI to help sovereign funds, REITs and M&A teams move faster and smarter than the market.	We pair institutional-grade financial models with agentic AI, so sovereign funds, PE sponsors, REITs and M&A teams underwrite faster with a full audit trail.	Names all four buyer types and the outcome.
Avatar chip	GLOBAL PARTNERS	SPECIALIST-LED	An unverified "partners" claim becomes a delivery fact.
Card 1 title	Multi-Industry Financial Analytics	CRE and Multi-Industry Modeling	Leads with the primary niche.
Card 1 body	From energy infrastructure to investment banking, we deliver DCF modeling, LBO analysis, M and A due diligence, and yield-tracking dashboards tailored to each sector's unique financial dynamics.	From commercial real estate to energy infrastructure, we build DCF, LBO and LP/GP waterfall models, M&A due diligence packs and yield dashboards.	Adds waterfall models; "M&A" is how people search.
Card 1 metric	90% / MODEL PRECISION RATE ACROSS ENGAGEMENTS	7 / ASSET CLASSES, INDUSTRIAL TO MIXED-USE	"Precision rate" is undefined; asset classes can be counted. Drop the % suffix.
Card 2 title	Agentic AI and Product Development	Keep	Already leads with the keyword.

Element	Live	New	Why
Card 2 body	We build the tools your team needs tomorrow. From autonomous stock analysis agents to secure LLM fine-tuning and enterprise API infrastructure, we engineer intelligence directly into your financial workflows.	We build AI agents that read filings, parse leases and loan documents, and run valuation checks. We also fine-tune LLMs and build secure APIs for your workflows.	Concrete tasks are what AI answers quote.
Card 2 metric	$2.5B+ / CAPITAL MODELED AND OPTIMIZED	5 / AI PRODUCT LINES, FROM AGENTS TO APIS	$2.5B+ now lives in the metrics bar; the AI Lab lists five products.
Card 3 badge	ENTERPRISE GRADE AI	PRIVATE BY DESIGN	Leads with the buyer's main concern.
Card 3 title	Sovereign AI Training for Investment Firms	Private AI Models for Investment Firms	Matches the search term.
Card 3 body	Your investment philosophy is your competitive advantage. We encode it into a fully private AI model that screens thousands of assets in seconds using your unique analytical DNA, not a generic algorithm	We train a private AI model on your past deals, valuation rules and risk limits. It screens thousands of assets in seconds, the way your investment committee would.	Clear cause and effect; ends the sentence properly.
Card 3 metric	4.8/5, five stars, GLOBALLY RECOGNIZED AI	100% / CLIENT-OWNED MODELS AND OUTPUTS	The rating has no source; ownership is a stated policy. Remove the star row.

Home 4. Ticker

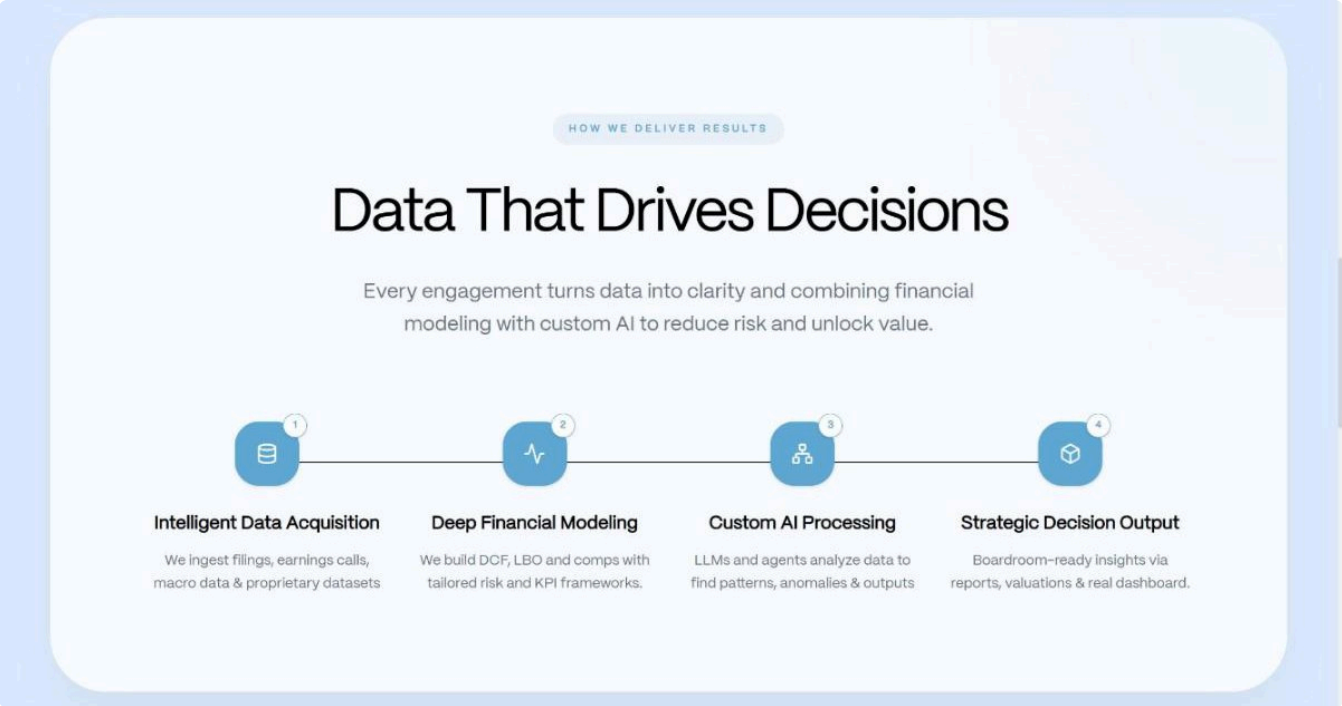

Block: Scrolling ticker (marquee) between sections.

Element	Live	New	Why
Ticker line 1	GYANSARATHI: TRUSTED BY CAPITAL MARKETS GLOBALLY	GYANASARATHI: FINANCIAL MODELING AND AGENTIC AI	Repeats the entity name next to both core terms.
Ticker line 2	SERVING INSTITUTIONAL CLIENTS ACROSS THE USA AND EUROPE AND THE MIDDLE EAST AND AUSTRALIA	SERVING INSTITUTIONAL INVESTORS WORLDWIDE FROM INDIA	Follows the location rule and reads in one pass.

Developer note: the ticker text repeats 6 times in the HTML. Ship one copy in the HTML and create the repeats in the animation code, marked aria-hidden="true", so screen readers read it once.

Home 5. Process

Block: 4-step process strip.

Element	Live	New	Why
Eyebrow	HOW WE DELIVER RESULTS	HOW AN ENGAGEMENT RUNS	Says plainly what follows.
H2	Data That Drives Decisions	Our Underwriting Process	Matches how buyers phrase the question.
Intro	Every engagement turns data into clarity and combining financial modeling with custom AI to reduce risk and unlock value.	Every engagement follows four steps that pair analyst-built financial models with custom AI to reduce errors and review time.	Fixes the grammar and states the mechanism.
Step 1 title	Intelligent Data Acquisition	Data Ingestion and Cleanup	Names the actual task.
Step 1 body	We ingest filings, earnings calls, macro data & proprietary datasets	We ingest rent rolls, T12s, filings, earnings calls and your own datasets.	Real estate inputs show domain depth.

Element	Live	New	Why
Step 2 title	Deep Financial Modeling	Financial Modeling	The exact keyword.
Step 2 body	We build DCF, LBO and comps with tailored risk and KPI frameworks.	We build DCF, LBO, comps and waterfall models with tailored risk tests.	Adds waterfall models.
Step 3 title	Custom AI Processing	Agentic AI Review	Says what the AI does in this step.
Step 3 body	LLMs and agents analyze data to find patterns, anomalies & outputs	AI agents test every assumption and flag outliers, gaps and anomalies.	A checkable action instead of "outputs".
Step 4 title	Strategic Decision Output	Decision-Ready Output	Shorter, same meaning.
Step 4 body	Boardroom-ready insights via reports, valuations & real dashboard.	Investment committee memos, valuations and live dashboards.	Fixes "real dashboard" and names the deliverables.

Home 6. Three disciplines

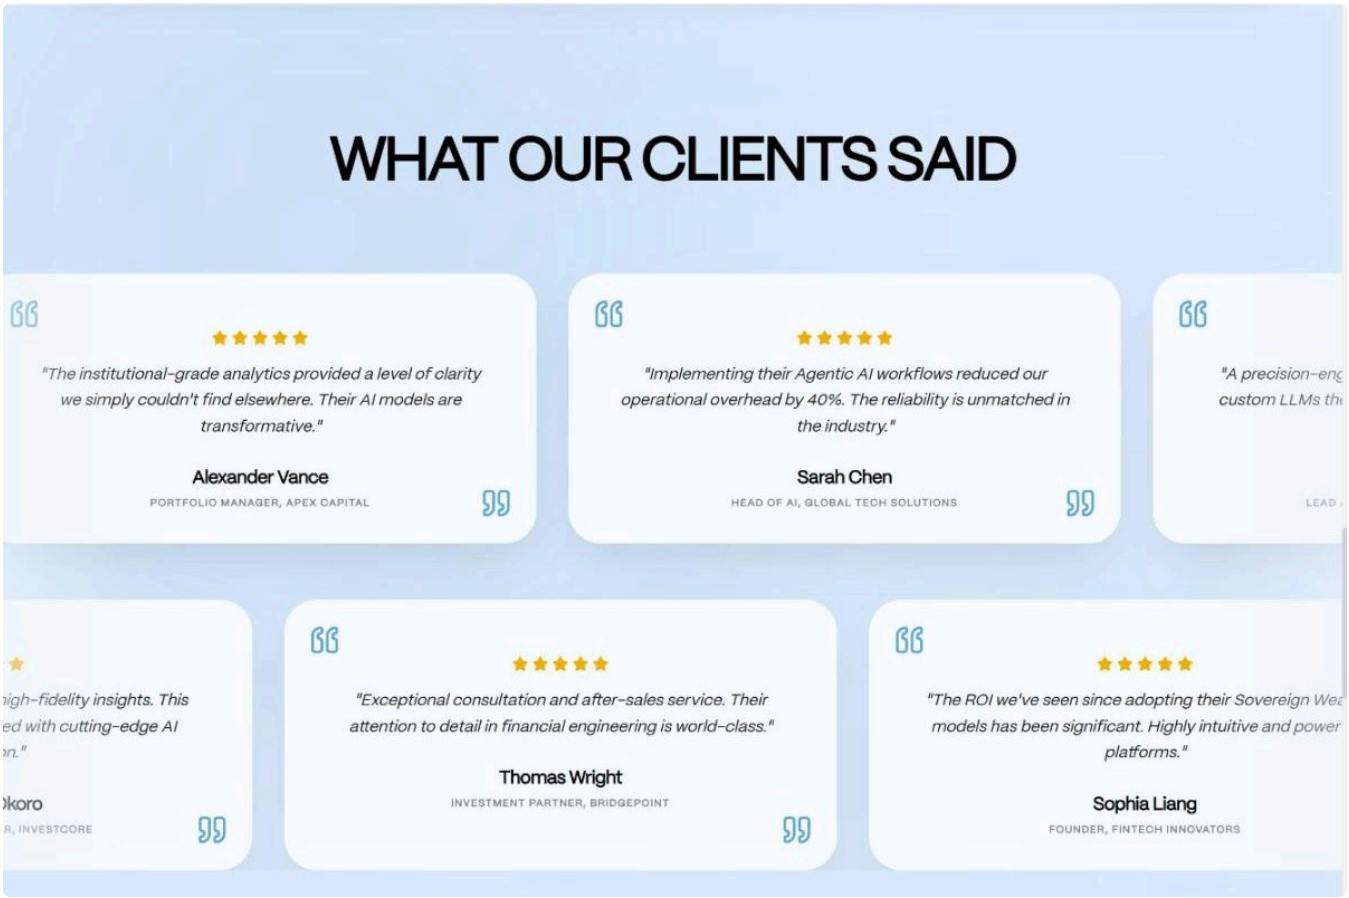

Block: Large-type statement: three lines with 3D icons, then one sentence.

Element	Live	New	Why
Line 1	Multi-Industry Analytics	Real Estate Underwriting	Same length, so the icon positions hold.
Line 2 (italic)	Agentic AI & Product Dev	Agentic AI & Automation	Plain service name, similar length.
Line 3 (italic)	Sovereign Wealth Models	Private AI Model Training	"Sovereign Wealth Models" reads as models for sovereign wealth funds; the new line uses the sitewide term at a similar length.

Element	Live	New	Why
Body	Collaborating with global pioneers to build financial architectures and AI-driven products that redefine the boundaries of what's possible in capital markets.	Use the Home answer capsule below	The page's definition, where AI answers look for it. About twice the live length; the block has open space below the text.

Developer note: the three lines sit inside one H4 today. Make them one H2 so headings run H1, then H2.

Home 7. Testimonials

Block: Social proof: two rows of scrolling quote cards (8 quotes).

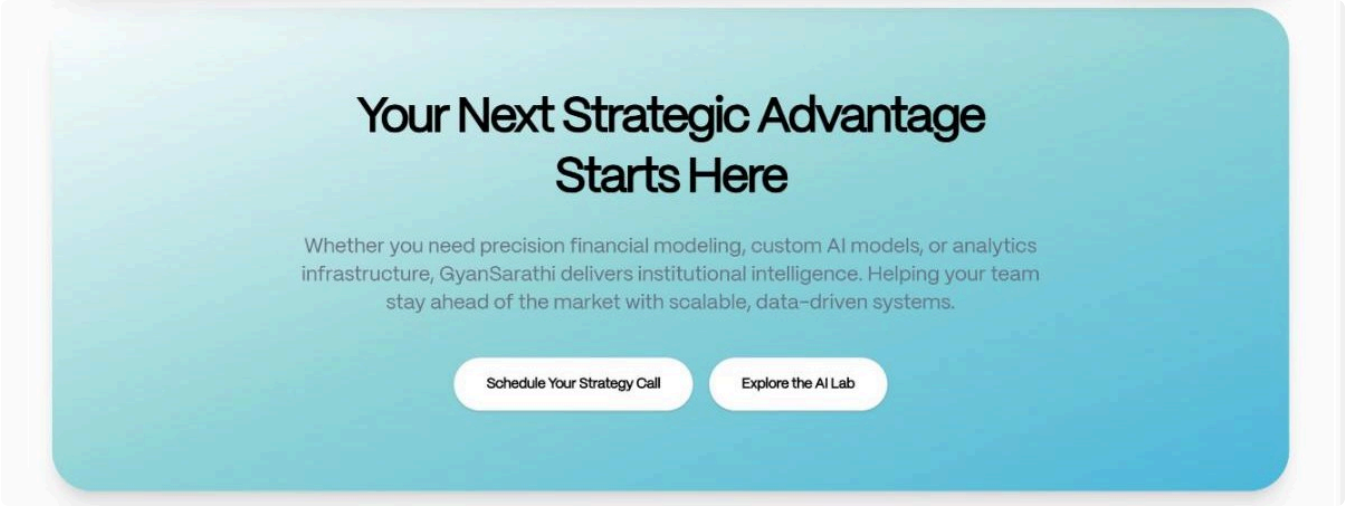

Element	Live	New	Why
H2	WHAT OUR CLIENTS SAID	WHAT CLIENTS SAY	Present tense, shorter.
8 quote cards	Alexander Vance (Apex Capital), Sarah Chen (Global Tech Solutions), Marcus Thorne (Sovereign Wealth Fund), Elena Rodriguez (Arca Group), Julian Kross (QuantEdge Financial), Dr. Amara Okoro (InvestCore), Thomas Wright (Bridgepoint), Sophia Liang (Fintech Innovators)	Replace with real client quotes used with written permission. Hide the block until you have at least three.	These read like template placeholders. Invented testimonials break the FTC rule and lose institutional readers on sight.

We have not written replacement quotes: they must come from clients, word for word. Use this format for each card:

- **Quote:** one or two sentences, up to 160 characters, ideally with one measurable result
- **Name and title:** or role only, if the client prefers
- **Firm type:** for example, "Real estate private equity sponsor, US"

Developer note: do not add Review or AggregateRating markup for these quotes. Google does not show review stars for reviews a business publishes about itself.

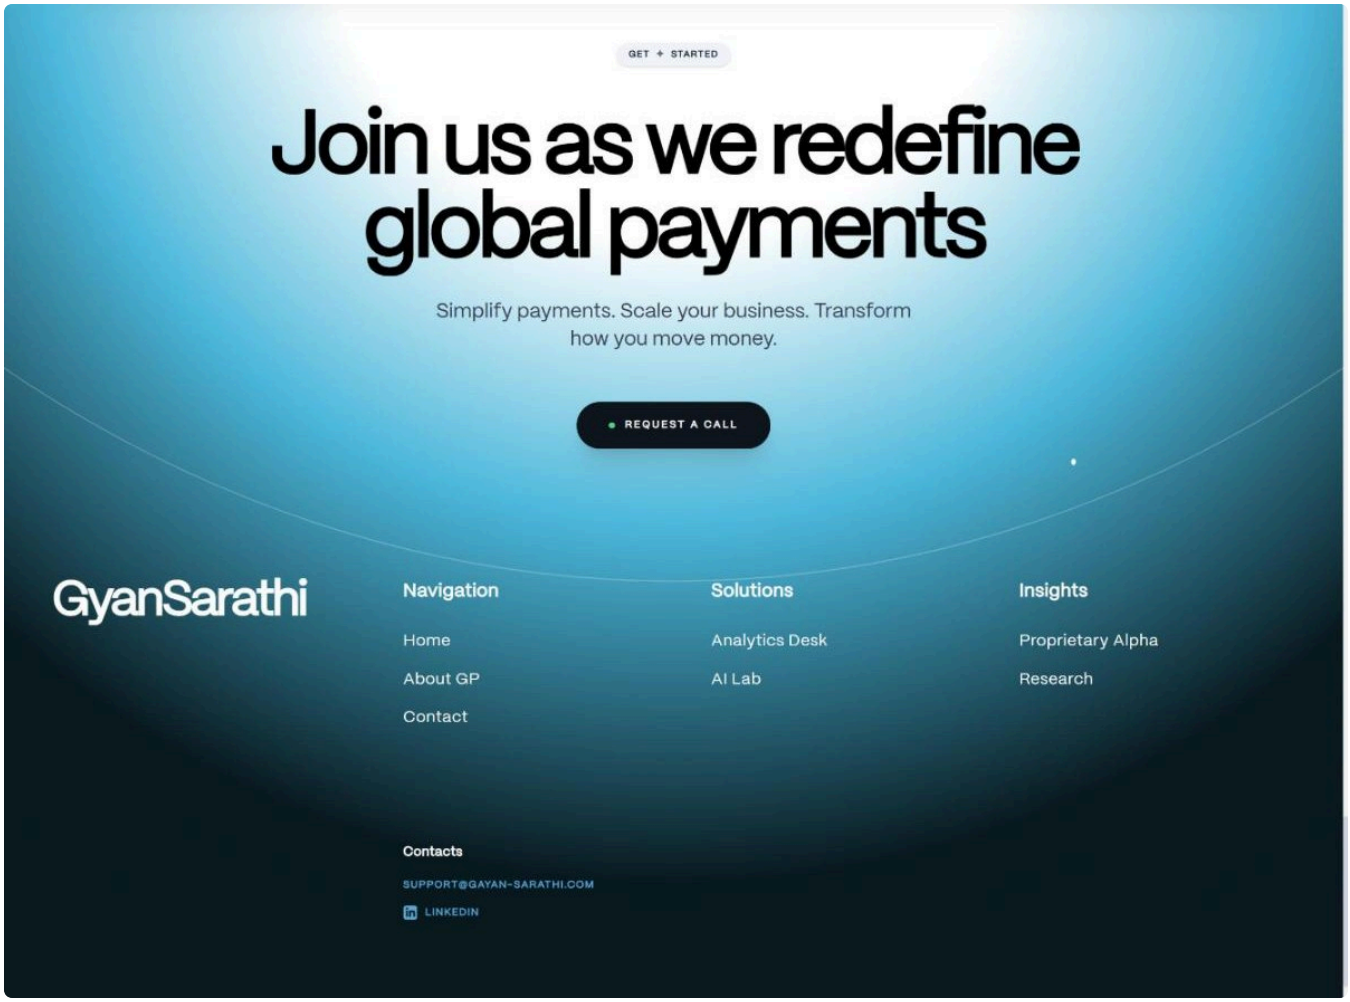

Home 8. Closing call to action

Block: CTA banner: H2, one paragraph, two buttons.

Element	Live	New	Why
H2	Your Next Strategic Advantage Starts Here	Bring Us Your Next Underwriting Mandate	A specific next step with the core keyword.
Body	Whether you need precision financial modeling, custom AI models, or analytics infrastructure, GyanSarathi delivers institutional intelligence. Helping your team stay ahead of the market with scalable, data-driven systems.	Need an acquisition model, a fund waterfall, a custom AI agent or a private AI model trained on your data? Gyanasarathi scopes it with you on a 30-minute call.	Concrete deliverables; fixes the sentence fragment and the brand spelling.
Button 1	Schedule Your Strategy Call	Book a Strategy Call	The primary CTA name sitewide; the body states the 30 minutes.
Button 2	Explore the AI Lab	Keep	Good anchor text.

Home 9. Footer (all 7 pages)

Block: Shared footer with a closing CTA. One change here fixes all 7 pages.

Element	Live	New	Why
Badge	GET ✦ STARTED	Keep	Clear as is.
H2	Join us as we redefine global payments	Model the Deal. Automate the Analysis.	Template copy about payments, replaced with your two services.
Body	Simplify payments. Scale your business. Transform how you move money.	Underwriting models and agentic AI for real estate and capital markets.	Same length, on topic.

Element	Live	New	Why
Button	REQUEST A CALL	BOOK A STRATEGY CALL	The primary CTA name sitewide; the pill widens by six characters.
Footer logo (H1 today)	GyanSarathi	Gyanasarathi	Brand spelling. Make it a div so each page keeps one H1.
New line under the logo	(empty)	Gyanasarathi is an India-based financial modeling and agentic AI firm.	The fixed opening sentence of every description, on every page.
Column heading	Contacts	Contact	Singular, standard.
Navigation link	About GP	About	Matches the nav rule.
Insights column link	Proprietary Alpha	Move to the Solutions column; add "Research Vault" (to /research) here instead	It is a product, not research; the Vault then gets a link on every page.
Email	SUPPORT@GAYAN-SARATHI.COM	contact@gyanasarathi.com [confirm]	The email domain differs from the site's; confirm which mailbox you monitor.
LinkedIn	LINKEDIN	Keep	Link it to the company page and list it in schema.

Home answer capsule

Question it answers: What does Gyanasarathi do?

> Gyanasarathi is an India-based financial modeling and agentic AI firm. It builds institutional-grade commercial real estate underwriting, DCF and LP/GP waterfall models. It also deploys AI agents and private AI models that automate analysis for private equity sponsors, REIT asset managers, sovereign funds and M&A teams worldwide.

Where it goes: the Home 6 paragraph under the three large lines, and the Organization description in JSON-LD. The footer line carries its first sentence on every page.

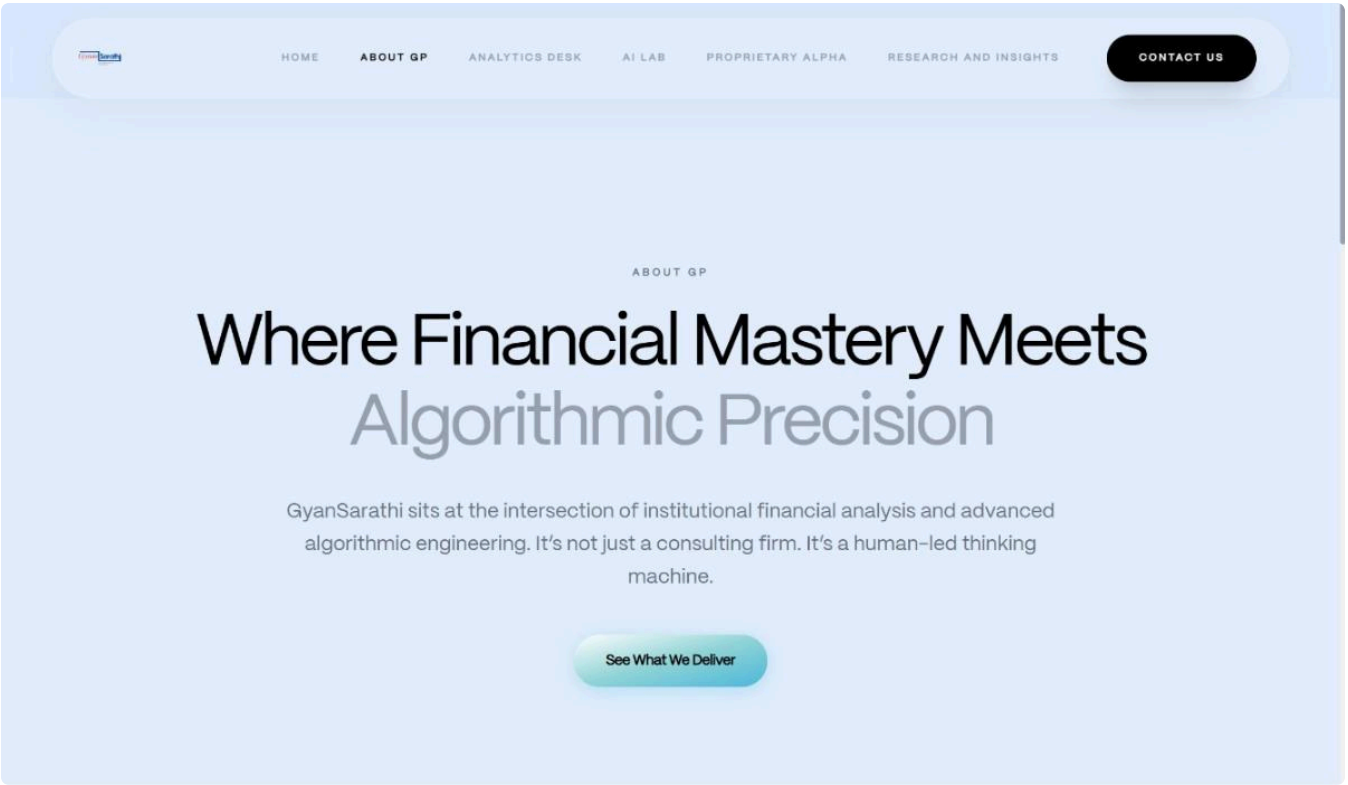

Home schema and internal links

- **Schema:** Organization and WebSite (JSON-LD section).
- **Hero buttons:** "Modeling Services" to /analytics, "Agentic AI" to /ai-lab.
- **Block 3 card titles:** link "CRE and Multi-Industry Modeling" to /analytics, "Agentic AI and Product Development" to /ai-lab, "Private AI Models for Investment Firms" to /alpha.
- **Footer:** add "Research Vault" to /research under Insights.

About page (/about)

About is where AI engines look for the people behind a firm. This page now names the founder, the asset classes and the tools, and drops the performance claims.

About 1. Hero

Block: Page hero: eyebrow, two-tone H1, paragraph, one button.

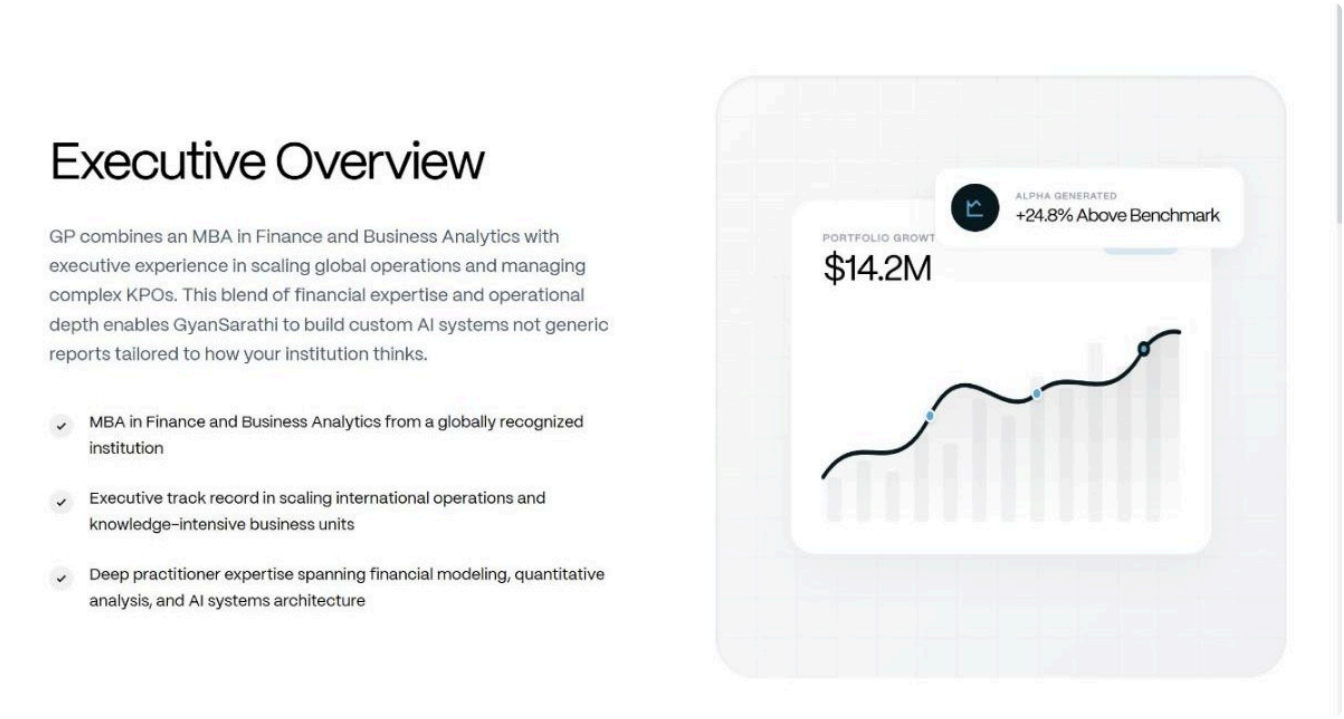

SEO metadata

- Primary keyword: about Gyanasarathi
- Secondary keywords: CRE underwriting expert, financial modeling and AI consultant, Argus Enterprise modeling
- Title tag (50 characters): About Gyanasarathi | CRE Modeling Meets Agentic AI
- Meta description (150 characters): Meet the founder behind Gyanasarathi: 7+ years of institutional CRE underwriting, an MBA in finance and analytics, and AI built in-house. Book a call.

Element	Live	New	Why
Eyebrow	ABOUT GP	ABOUT GYANASARATHI	Names the entity; to PE readers "GP" means general partner.
H1, line 1	Where Financial Mastery Meets	Where Financial Modeling Meets	Swaps an adjective for the keyword.

Element	Live	New	Why
H1, line 2	Algorithmic Precision	Agentic AI Engineering	Adds the second core term.
Body	GyanSarathi sits at the intersection of institutional financial analysis and advanced algorithmic engineering. It's not just a consulting firm. It's a human-led thinking machine.	Gyanasarathi is a modeling desk and an AI lab under one roof. Our analysts underwrite real assets; our engineers turn that judgment into AI that scales it.	Says what the firm is in the first sentence.
Button	See What We Deliver	Keep	Clear as is.

About 2. Executive overview

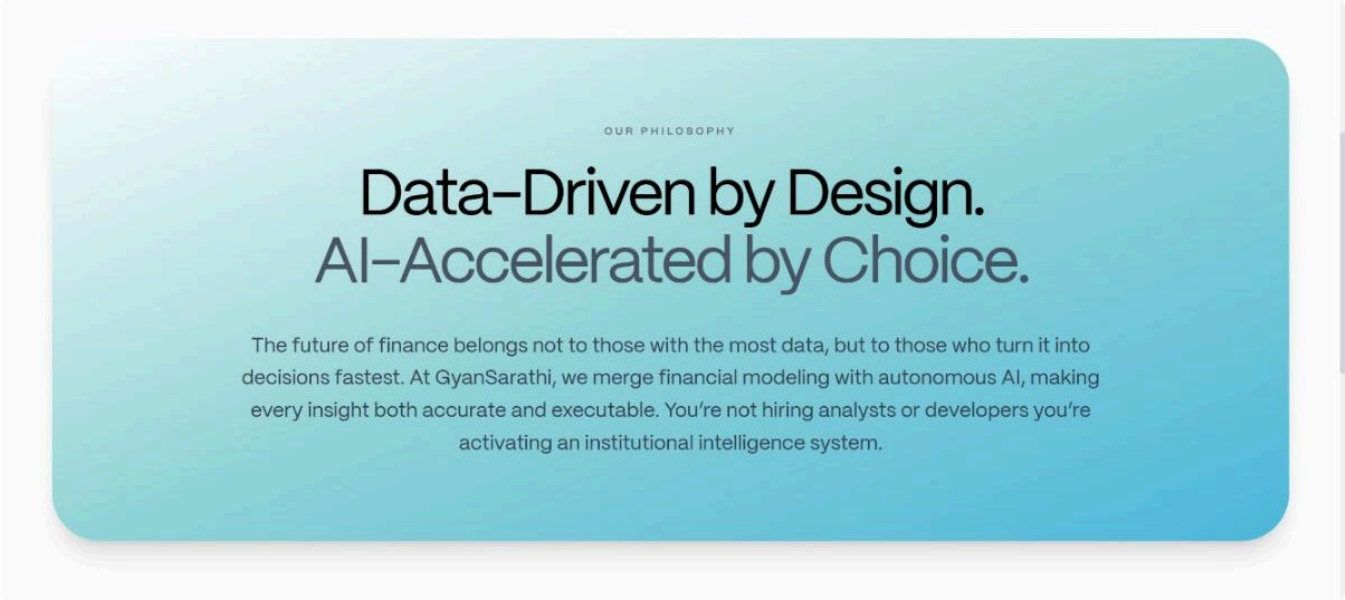

Block: Two columns: H2, paragraph and three bullets on the left; stat cards and chart on the right.

Element	Live	New	Why
H2	Executive Overview	Who Leads Gyanasarathi	Answers the question this section exists for.
Body	GP combines an MBA in Finance and Business Analytics with executive experience in scaling global operations and managing complex KPOs. This blend of financial expertise and operational depth enables GyanSarathi to build custom AI systems not generic reports tailored to how your institution thinks.	Use the About answer capsule below	A definition AI answers can lift whole; about 15% longer, which the left column absorbs.
Bullet 1	MBA in Finance and Business Analytics from a globally recognized institution	MBA in Finance and Business Analytics, Sri Sri University [confirm]	A named school can be checked; "globally recognized" cannot. Drop the name if you prefer.
Bullet 2	Executive track record in scaling international operations and knowledge-intensive business units	Executive track record in scaling knowledge-process outsourcing (KPO) teams for global clients	Spells out KPO once.
Bullet 3	Deep practitioner expertise spanning financial modeling, quantitative analysis, and AI systems architecture	Hands-on in Argus Enterprise, Excel DCF and LP/GP waterfall models, and AI systems design	Named tools are entities AI engines recognize.

Element	Live	New	Why
Small card label	ALPHA GENERATED	FOUNDER TRACK RECORD	"Alpha" is an investment-performance claim.
Small card value	+24.8% Above Benchmark	7+ Years of CRE Underwriting	Return claims need audited support; years of practice can be checked.
Chart card label	PORTFOLIO GROWTH	CAPITAL MODELED	Matches the Home metric.
Chart card value	$14.2M / Year to Date	$2.5B+ / Underwritten [confirm]	One figure sitewide, same length as live.

About 3. Philosophy

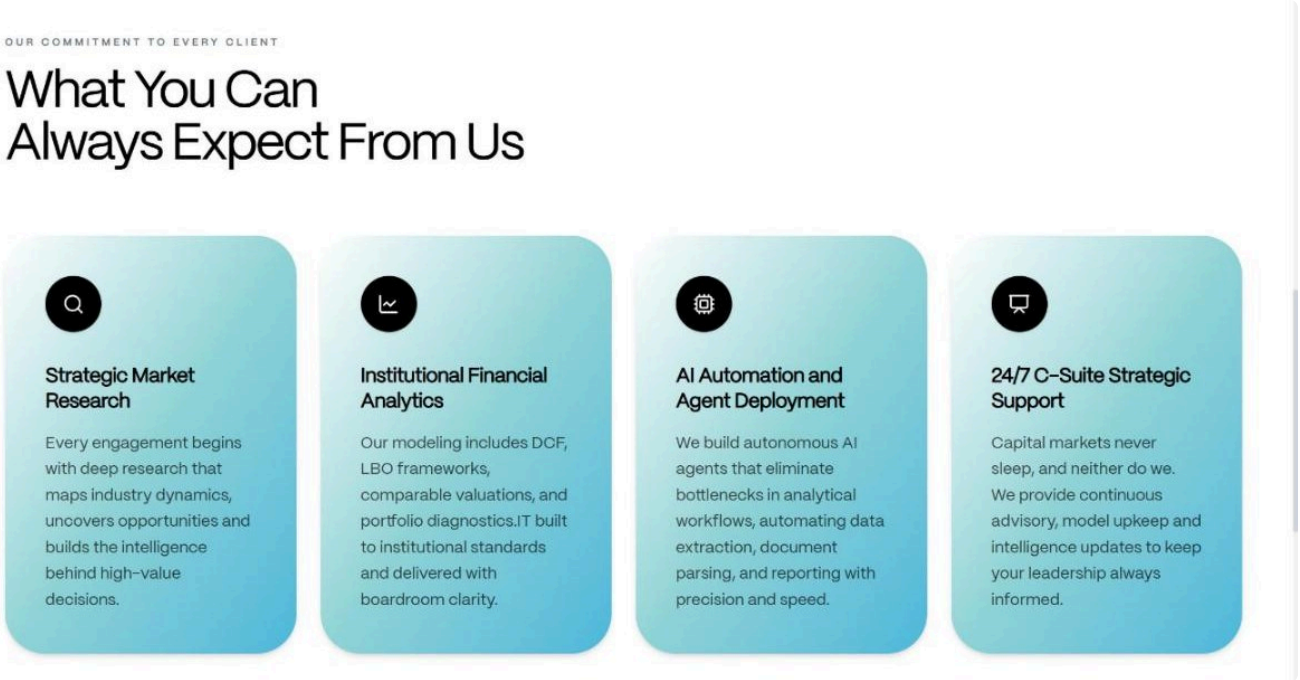

Block: Centered banner: eyebrow, two-line H2, paragraph.

Element	Live	New	Why
Eyebrow	OUR PHILOSOPHY	Keep	Clear as is.
H2	Data-Driven by Design. AI-Accelerated by Choice.	Keep	Memorable and accurate.

Element	Live	New	Why
Body	The future of finance belongs not to those with the most data, but to those who turn it into decisions fastest. At GyanSarathi, we merge financial modeling with autonomous AI, making every insight both accurate and executable. You're not hiring analysts or developers you're activating an institutional intelligence system.	Investment teams rarely lack data; they lack time to turn it into a defensible decision. At Gyanasarathi, AI agents take the repetitive work: data entry, document review and scenario runs. Analysts build, check and sign off every model. You get one team that models and automates.	States who does what; fixes the run-on sentence.

About 4. Commitments

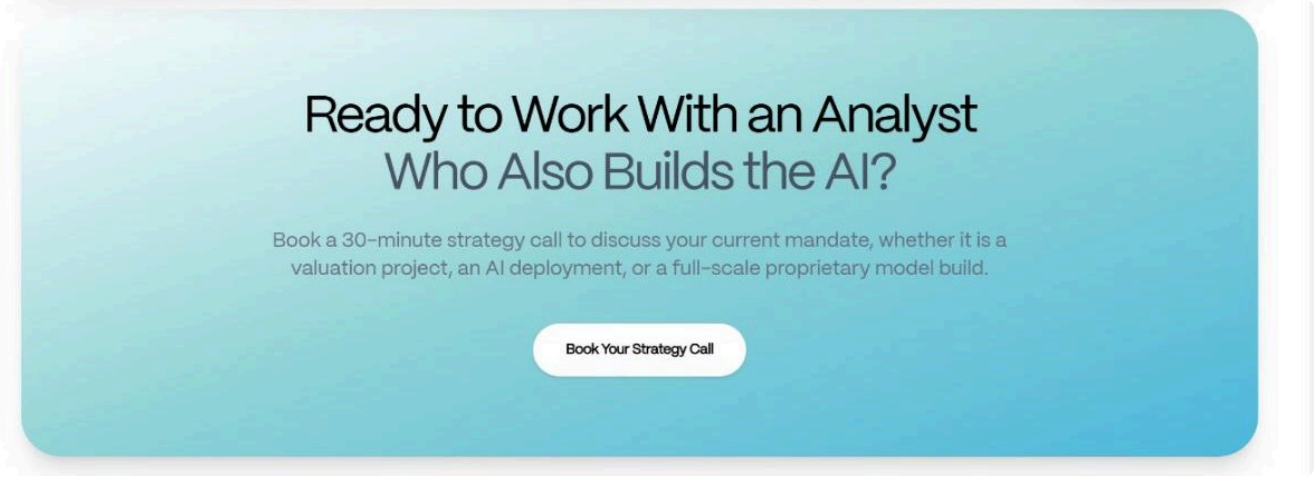

Block: 4-card grid with icons.

Element	Live	New	Why
Eyebrow	OUR COMMITMENT TO EVERY CLIENT	Keep	Clear as is.
H2	What You Can Always Expect From Us	What Our Engagements Cover	True for every engagement type, and shorter.
Card 1 title	Strategic Market Research	Market and Submarket Research	Real estate buyers think in submarkets.
Card 1 body	Every engagement begins with deep research that maps industry dynamics, uncovers opportunities and builds the intelligence behind high-value decisions.	Every engagement starts with market research on supply, demand, rents and cap rate comps, so each model assumption rests on evidence.	Names the inputs.
Card 2 title	Institutional Financial Analytics	Institutional Financial Modeling	The keyword.
Card 2 body	Our modeling includes DCF, LBO frameworks, comparable valuations, and portfolio diagnostics.IT built to institutional standards and delivered with boardroom clarity.	DCF, LBO, comparable valuations and portfolio diagnostics, built to institutional standards and documented so your investment committee can audit every input.	Fixes the ".IT" typo; adds auditability.
Card 3 title	AI Automation and Agent Deployment	Keep	Already keyword-led.

Element	Live	New	Why
Card 3 body	We build autonomous AI agents that eliminate bottlenecks in analytical workflows, automating data extraction, document parsing, and reporting with precision and speed.	We deploy AI agents that extract data from rent rolls, leases and filings, parse documents and draft reports, cutting manual hours in every analytical cycle.	Specific documents and a clear effect.
Card 4 title	24/7 C-Suite Strategic Support	Follow-the-Sun Model Support	True for a team in India serving other time zones.
Card 4 body	Capital markets never sleep, and neither do we. We provide continuous advisory, model upkeep and intelligence updates to keep your leadership always informed.	With our team in India, work moves while your office is closed: model updates, scenario reruns and data refreshes are ready when your day starts.	Replaces a 24/7 promise with a real time-zone benefit.

About 5. Call to action

Block: CTA banner: two-line H2, paragraph, one button.

Element	Live	New	Why
H2	Ready to Work With an Analyst Who Also Builds the AI?	Keep	States the differentiator in the buyer's words.
Body	Book a 30-minute strategy call to discuss your current mandate, whether it is a valuation project, an AI deployment, or a full-scale proprietary model build.	Book a 30-minute strategy call about your current mandate: a valuation, a fund waterfall, an AI deployment or a private AI model build.	Tighter; adds the waterfall use case.
Button	Book Your Strategy Call	Book a Strategy Call	The primary CTA name sitewide.

About answer capsule

Question it answers: Who is behind Gyanasarathi?

> Gyanasarathi is led by founder Gyan [surname]. Gyan brings 7+ years of institutional commercial real estate underwriting across industrial, office, retail, multifamily, hospitality, medical office and mixed-use assets. Gyan also holds an MBA in Finance and Business Analytics, builds AI systems and has scaled a knowledge-process outsourcing firm.

Where it goes: the Executive overview paragraph (About 2), and the Person description in JSON-LD.

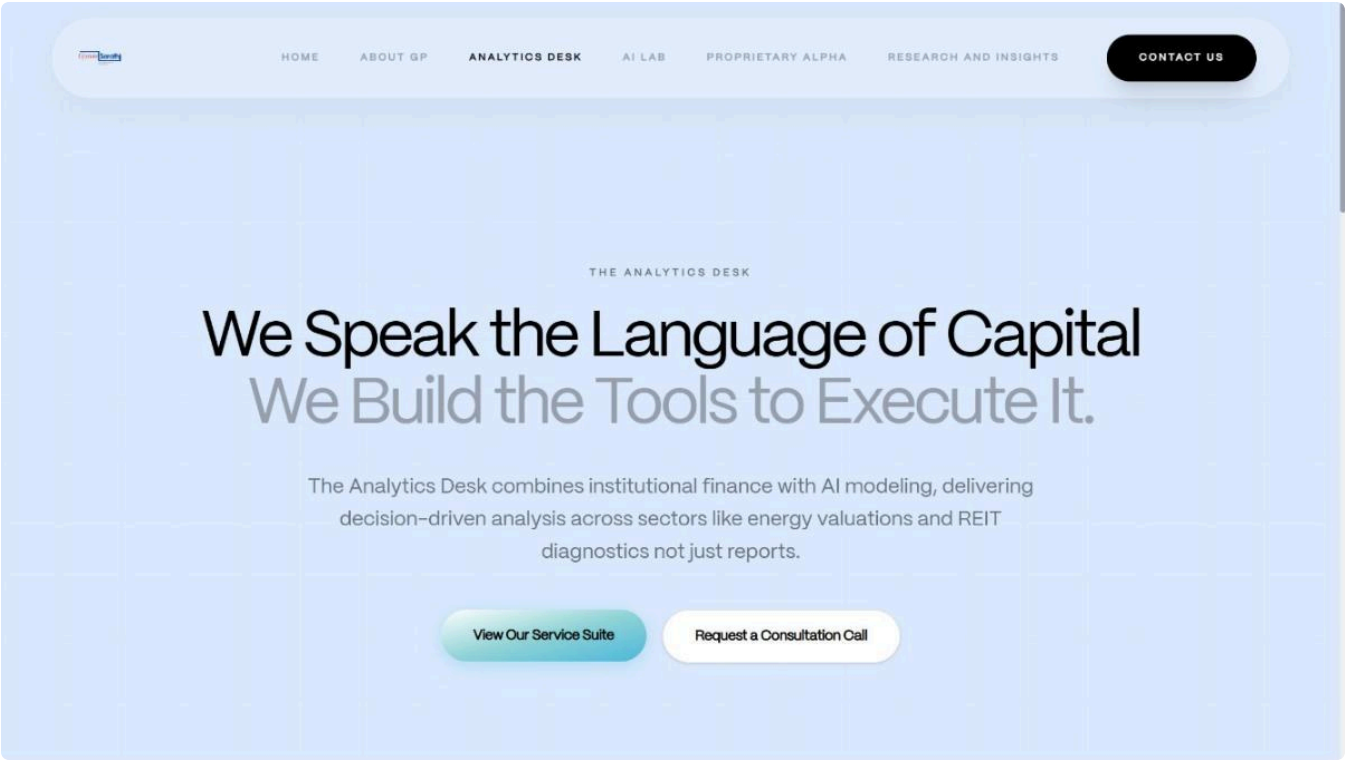

About schema and internal links

- **Schema:** AboutPage plus Person for the founder, linked to the Organization (JSON-LD section).
- **Card links:** "Institutional Financial Modeling" to /analytics, "AI Automation and Agent Deployment" to /ai-lab.
- **Founder profile:** link the founder's LinkedIn from About 2 and list it in the Person sameAs.

Analytics Desk (/analytics)

This is the main commercial page. It now targets "real estate financial modeling services" and names every model type a sponsor or REIT analyst would search for.

Analytics 1. Hero

Block: Page hero: eyebrow, two-tone H1, paragraph, two buttons.

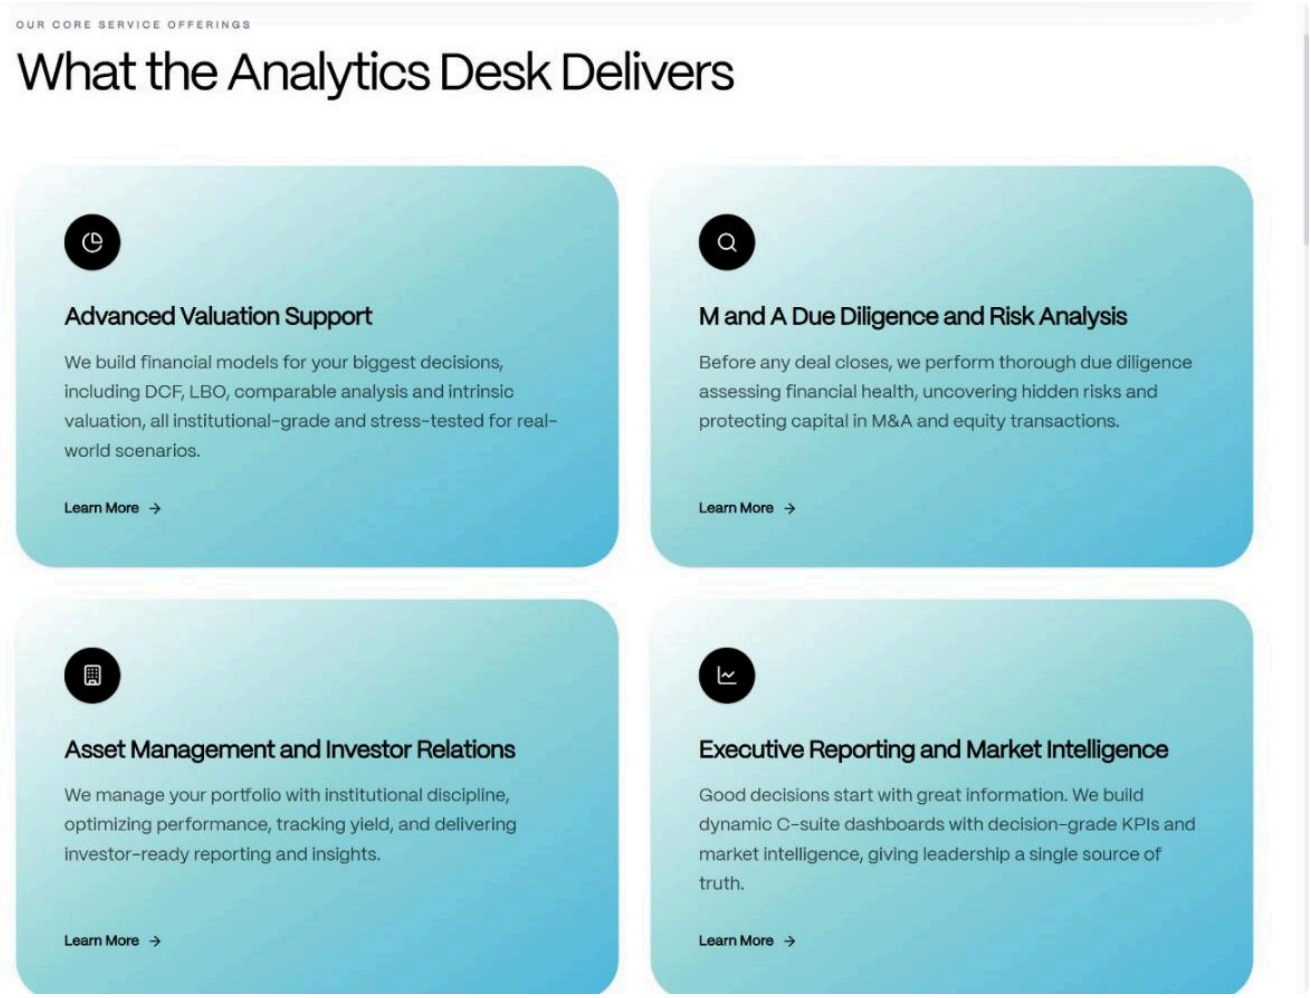

SEO metadata

- Primary keyword: real estate financial modeling services
- Secondary keywords: DCF and LBO modeling, LP/GP waterfall model, development pro forma, M&A due diligence support, REIT analysis
- Title tag (54 characters): Real Estate Financial Modeling Services | Gyanasarathi
- Meta description (145 characters): Acquisition, development and LP/GP waterfall models, DCF and LBO valuation, and M&A due diligence, built to institutional standards. Book a call.

Element	Live	New	Why
Eyebrow	THE ANALYTICS DESK	Keep	Product name, clear.

Element	Live	New	Why
H1, line 1	We Speak the Language of Capital	Real Estate Financial Modeling,	The page's primary keyword, at the same length.
H1, line 2	We Build the Tools to Execute It.	Built to Institutional Standards.	Keeps the confident tone.
Body	The Analytics Desk combines institutional finance with AI modeling, delivering decision-driven analysis across sectors like energy valuations and REIT diagnostics not just reports.	The Analytics Desk builds acquisition, development and fund-level models for real estate and infrastructure investors, with AI checks on every input and output.	Names the model types; fixes the missing punctuation.
Button 1	View Our Service Suite	View Modeling Services	Descriptive anchor text.
Button 2	Request a Consultation Call	Book a Strategy Call	The primary CTA name sitewide.

Analytics 2. Core services

Block: 2x2 service card grid, each card with icon, title, paragraph and link.

Element	Live	New	Why
Eyebrow	OUR CORE SERVICE OFFERINGS	Keep	Clear as is.
H2	What the Analytics Desk Delivers	Our Financial Modeling Services	The exact service keyword.
Card 1 title	Advanced Valuation Support	Valuation and DCF Modeling	Names the method buyers search for.

Element	Live	New	Why
Card 1 body	We build financial models for your biggest decisions, including DCF, LBO, comparable analysis and intrinsic valuation, all institutional-grade and stress-tested for real-world scenarios.	DCF, LBO, comparable and intrinsic valuation models for acquisitions and recapitalizations, stress-tested across interest rate, rent growth and exit cap rate scenarios.	Names the scenario variables institutional readers check.
Card 2 title	M and A Due Diligence and Risk Analysis	M&A Due Diligence and Risk Analysis	"M&A" is the searched form.
Card 2 body	Before any deal closes, we perform thorough due diligence assessing financial health, uncovering hidden risks and protecting capital in M&A and equity transactions.	Before a deal closes, we check financial statements, rent rolls, leases and debt terms, then run downside cases, so risks surface before capital moves.	Lists what actually gets checked.
Card 3 title	Asset Management and Investor Relations	Asset Management and Investor Reporting	Reporting is the deliverable.
Card 3 body	We manage your portfolio with institutional discipline, optimizing performance, tracking yield, and delivering investor-ready reporting and insights.	We support asset managers with budget-versus-actual tracking, yield and covenant monitoring, and quarterly reports ready to send to LPs.	"We manage your portfolio" reads as acting as asset manager; describe the support role unless you do manage assets.
Card 4 title	Executive Reporting and Market Intelligence	Executive Dashboards and Market Intelligence	Names the product.

Element	Live	New	Why
Card 4 body	Good decisions start with great information. We build dynamic C-suite dashboards with decision-grade KPIs and market intelligence, giving leadership a single source of truth.	We build C-suite dashboards that combine portfolio KPIs with market data, so leadership reviews one source of truth instead of scattered spreadsheets.	Cause and effect, no filler opener.
Card links (4)	Learn More	Keep, and point each to its own service section or page	Gives each card a real destination; ranking each service needs its own page.

Analytics 3. Sectors

Image — Live Analytics Desk sector chips, 19 Oct 2026

Block: Eyebrow, H2 and a cloud of sector chips. Replace chips in order.

Element	Live	New	Why
Eyebrow	SECTORS WE SERVE	Keep	Clear as is.
H2	From Energy to Investment Banking: We Know Your Industry	From Real Estate to Energy: The Sectors We Model	Leads with the primary niche.
Chip 1	Energy, Oil & Gas	Real Estate Private Equity	The core buyer comes first.
Chip 2	Infrastructure & Utilities	REITs and Listed Real Estate	The plain search term for REITs.
Chip 3	Investment Banking: Real Estate and Infrastructure Groups	Multifamily, Hospitality and Mixed-Use	Asset types buyers search by name.

Element	Live	New	Why
Chip 4	Real Estate Investment Trusts and Publicly Traded Real Estate	Real Estate and Infrastructure Banking	Keeps the banking-group audience, shorter.
Chip 5	Hospitality, Leisure and Property Management	Infrastructure and Utilities	Moves down the order, same scope.
Chip 6	Banking and Mortgage Services	Energy, Oil and Gas	Moves down the order.
Chip 7	Real Estate Financial Analytics and Acquisitions	Lending and Mortgage Finance	The live chip is a service, not a sector.
Chip 8 (new)	(none)	Corporate Finance: Healthcare to Manufacturing	Adds finance teams in other industries, your secondary focus.

Analytics 4. Real Estate Financial Intelligence Suite

Image — Live Analytics Desk suite block, 19 Oct 2026

Block: Feature block: text and checklist on the left, 4-phase graphic on the right, 5-step strip below.

Element	Live	New	Why
Eyebrow	SPECIALIZED CAPABILITY	Keep	Clear as is.
H2	Real Estate Financial Intelligence Suite for institutional-grade precision.	Real Estate Financial Intelligence Suite: From Underwriting to Waterfall	Keeps the product name and adds the two most searched tasks.

Element	Live	New	Why
Body	Real estate capital transactions are complex, so our Real Estate Financial Intelligence Suite delivers institutional-grade precision across the deal lifecycle from underwriting to waterfall distributions turning complexity into closed deals.	Use the Analytics Desk answer capsule below	About 50% longer; the left column has spare height beside the phase graphic.
Bullet 1	Complex acquisition modeling and feasibility analysis	Acquisition modeling and feasibility analysis	"Complex" adds nothing.
Bullet 2	Ground-up development pro forma and phased funding analysis	Keep	Already precise.
Bullet 3	CMulti-layer cash flow structuring and distribution modeling	Multi-tier cash flow structuring and distribution modeling	Fixes the "CMulti" typo.
Bullet 4	LP and GP waterfall structuring with preferred return frameworks	LP/GP waterfall models with preferred return, catch-up and promote tiers	Names the tiers a sponsor checks first.
Bullet 5	Asset-level underwriting for individual properties and portfolio acquisitions	Keep	Already precise.
Phase cards	Capital / Modeling / AI Analysis / Investment Output	Inputs / Modeling / AI Review / Decision Pack	"Capital" was not a step; these are short forms of the strip names below.

Element	Live	New	Why
Step strip	Data Ingestion / Financial Modeling / AI-Assisted Analysis / Risk Optimization / Investment Output	Data Ingestion / Financial Modeling / Agentic AI Review / Scenario Testing / Decision Pack	"Risk Optimization" is vague; scenario testing is the actual work.

Analytics 5. Call to action

Image — Live Analytics Desk CTA, 19 Oct 2026

Block: CTA banner: two-line H2, paragraph, two buttons.

Element	Live	New	Why
H2	Every Complex Deal Deserves a Sharper Analytical Edge	Keep	Specific and on brand.
Body	Talk to our financial modeling team about your current mandate. We match the right analytical framework to your exact challenge and deliver results at the speed your decisions require.	Talk to our financial modeling team about your current mandate. On the first call we scope the model, the timeline and the review steps.	Tells the reader what the call produces.
Button 1	Schedule Strategic Call	Book a Strategy Call	The primary CTA name sitewide.
Button 2	Access your Client Portal	Keep only if a client portal exists [confirm]	A button with no portal behind it costs trust.

Analytics answer capsule

Question it answers: Who provides real estate financial modeling and waterfall analysis?

> Gyanasarathi's Analytics Desk provides institutional real estate financial modeling. It covers acquisition underwriting, development pro formas, DCF and LBO valuation, and LP/GP waterfall models with preferred return, catch-up and promote tiers. Analysts build every model, AI agents check every input, and each file is documented for investment committee review.

Where it goes: the Suite paragraph (Analytics 4), and the Service description in JSON-LD.

Analytics schema and internal links

- **Schema:** Service with an OfferCatalog of the four core services, plus BreadcrumbList (JSON-LD section has the template).
- **Hero body:** link "AI checks" to /ai-lab.
- **Suite bullet 4:** link "LP/GP waterfall models" to the Energy and Infrastructure Valuation Templates page in the Research Vault, once it exists.
- **CTA:** both strategy call buttons go to /contact.

AI Lab (/ai-lab)

The AI Lab page now targets "agentic AI for financial services" and replaces claims like "superhuman scale" with what each system reads, checks and delivers.

AI Lab 1. Hero

Image — Live AI Lab hero, 19 Oct 2026

Block: Page hero: eyebrow, two-tone H1, paragraph, two buttons.

SEO metadata

- Primary keyword: agentic AI for financial services
- Secondary keywords: AI agents for investment firms, fine-tuned financial LLM, financial document AI, valuation API
- Title tag (55 characters): Agentic AI for Financial Services | Gyanasarathi AI Lab
- Meta description (146 characters): AI agents, fine-tuned financial LLMs and valuation APIs for investment teams, deployed privately with full audit trails. Book a discovery session.

Element	Live	New	Why
Eyebrow	THE AI LAB	Keep	Product name, clear.
H1, line 1	We Do Not Just Use AI.	Agentic AI for Finance.	The primary keyword in the H1, at the same length.
H1, line 2	We Build It. For You.	Built Around Your Data.	Keeps the "we build" message.
Body	Where financial knowledge becomes machine intelligence. We engineer proprietary AI agents, autonomous workflows, and institutional APIs that transform how investment firms analyze and execute at superhuman scale.	The AI Lab builds AI agents, fine-tuned LLMs and valuation APIs that automate research, document review and modeling for investment firms. Every output traces back to its source.	Replaces "superhuman scale" with what the systems do.
Button 1	Explore Our AI Products	Keep	Clear as is.
Button 2	Request a Technical Integration	Keep	Clear as is.

AI Lab 2. Agentic workflows

Image — Live AI Lab intro section, 19 Oct 2026

Block: Centered H2, paragraph and four checklist tiles.

Element	Live	New	Why
H2	From Manual Analysis to Machine-Driven Autonomy	From Manual Analysis to Agentic Workflows	Uses the term buyers search.

Element	Live	New	Why
Body	Most firms use off-the-shelf AI and wonder why outputs fail their thesis. We take a different approach: engineering every system from the ground up for financial markets, creating autonomous bridges between raw data and confident capital allocation. Our systems are designed to:	Use the AI Lab answer capsule below	About 10% longer. Drop the "designed to:" lead-in; the tiles read on their own.
Tile 1	Ingest and normalize multi-source financial data automatically	Keep	Specific and accurate.
Tile 2	Analyze market dynamics and asset fundamentals in real time	Keep	Specific and accurate.
Tile 3	Generate deterministic valuations calibrated to institutional standards	Keep	"Deterministic" signals repeatable results, which institutions require.
Tile 4	Dramatically reduce human dependency without compromising accuracy	Cut manual hours while analysts keep final sign-off	Human review is a selling point for institutions, not a cost.

AI Lab 3. Product suite

Image — Live AI Lab product cards, 19 Oct 2026

Block: 5-card product grid (3 cards, then 2), each with icon, title, paragraph and ability list.

Element	Live	New	Why
Eyebrow	WHAT WE HAVE BUILT	Keep	Clear as is.
H2	Our Proprietary AI Product Suite	Our AI Products for Investment Teams	Names the audience.
Card 1 title	Agentic Stock Analysis Engine	Keep	Specific, keyword-rich product name.
Card 1 body	Our flagship product. Fully autonomous AI agents that ingest SEC filings, earnings calls, and macro feeds to produce mathematically grounded intrinsic valuations--instantly.	Our flagship product. AI agents read SEC filings, earnings calls and macro data, then produce intrinsic valuations with every assumption sourced.	Swaps "instantly" for an auditable promise.
Card 2 title	Technical Market Intelligence Agents	Keep	Clear as is.
Card 2 body	Quantitative AI models built for the technical side of capital markets. These agents identify patterns, track momentum shifts, and auto-generate interpretations with institutional precision.	Quantitative agents for technical analysis. They detect trends and momentum shifts and write a plain-English read of each signal for your analysts.	Says what the analyst receives.
Card 3 title	End-to-End AI Automation Workflows	Keep	Clear as is.
Card 3 body	Remove the manual layer from your operations. Our autonomous workflow systems handle everything from document ingestion to financial structuring and preliminary diagnostics.	Remove the manual layer from operations. Workflows take documents in, extract the data, build first-pass financials and flag issues for review.	Names each stage of the workflow.

Element	Live	New	Why
Card 4 title	Enterprise Financial API Infrastructure	Valuation and Risk APIs	Plain product name; "enterprise valuation" would read as enterprise value.
Card 4 body	Integrate our proprietary valuation and risk models directly into your platforms via secure, scalable APIs--giving your tech stack institutional-grade analytical power.	Plug our valuation and risk models into your own platforms through secure, versioned APIs, so your systems call the same logic your analysts trust.	"Versioned" tells engineers results stay reproducible.
Card 5 title	Bespoke Financial LLM Solutions	Fine-Tuned Financial LLMs	The phrase buyers search.
Card 5 body	Custom-tuned LLMs fine-trained on financial data. They parse, interpret, and structure outputs from due diligence files, underwriting documents, and complex legal covenants. We lock down knowledge silos.	Language models fine-tuned on financial documents. They read diligence files, underwriting packages and loan covenants and return structured data inside a private, isolated environment.	Says where the data stays instead of "lock down knowledge silos".
Ability lists	KEY ABILITIES and CORE PILLARS lists	Keep	Short, specific and scannable.

AI Lab 4. Process

Image — Live AI Lab process strip, 19 Oct 2026

Block: 5-step process strip.

Element	Live	New	Why
Eyebrow	PROCESS	Keep	Clear as is.
H2	How the AI Lab Operates	How the AI Lab Works	Plainer.
Steps	Data Ingestion / Model Processing / AI Analysis Layer / Optimization Engine / Output Delivery	Data Ingestion / Model Training / Agent Analysis / Human Review / Secure Delivery	Shows where people check the work; vague engine names go.

AI Lab 5. Why the AI Lab

Image — Live AI Lab differentiators, 19 Oct 2026

Block: Two columns: H2 and five proof tiles on the left, feature card on the right.

Element	Live	New	Why
Eyebrow	WHY CHOOSE THE AI LAB	Keep	Clear as is.
H2, line 1	Not a generic AI tool	Not a Generic AI Tool.	Title case to match line 2.
H2, line 2	Purpose-Built Financial Intelligence.	Purpose-Built for Financial Analysis.	Adds the keyword at the same length.
Tile 1	Architected exclusively for the complexity of financial markets, not retrofitted from generic AI tools	Built on underwriting and valuation logic, not retrofitted from a general chatbot	Names the logic it is built on.
Tile 2	Designed to serve institutional-scale decision-making environments with full auditability	Every output traceable to its source data, for a full audit trail	States the audit trail directly.

Element	Live	New	Why
Tile 3	Laser-focused on automating the highest-value analytical workflows in investment management	Focused on the analytical work that takes most of an analyst's week	Plain and concrete.
Tile 4	Deeply integrated with our proprietary financial modeling frameworks for coherent output	Runs on the same models our Analytics Desk delivers to clients	Links the two desks for readers and AI.
Tile 5	Enterprise-grade security, compliance readiness, and horizontal scalability built in from day one	Private deployment and isolated client data from day one	Keeps only claims you can show; add certifications when you have them.
Card title	Institutional Autonomy	Human-Led, AI-Scaled	Says who decides.
Card body	We merge deep capital market understanding with state-of-the-art algorithmic precision.	Analysts set the logic and sign off; AI agents do the repetitive work at scale.	The operating model in one line.

AI Lab 6. Call to action

Image — Live AI Lab CTA, 19 Oct 2026

Block: CTA banner: two-line H2, paragraph, two buttons.

Element	Live	New	Why
H2	Ready to Build Intelligence Into Your Financial Systems?	Keep	A clear ask.

Element	Live	New	Why
Body	Whether you need a custom AI agent, a fine-tuned LLM, or fully integrated API infrastructure, the AI Lab is ready. Book a technical discovery session and let us map out what is possible.	Whether you need a custom AI agent, a fine-tuned LLM or an API integration, start with a technical discovery session. We map your data, workflow and success metrics first.	Tells the buyer what the session covers.
Button 1	Book a Technical Discovery Session	Keep	Clear as is.
Button 2	Access the Developer Portal	Keep only if a developer portal exists [confirm]	A button with no portal behind it costs trust.

AI Lab answer capsule

Question it answers: Who builds agentic AI for financial services?

> Gyanasarathi's AI Lab builds agentic AI for investment teams. Its AI agents read filings, rent rolls and market data, run valuation and risk checks, and draft analysis for analyst sign-off. It also delivers fine-tuned financial LLMs and valuation APIs, deployed privately so client data stays isolated.

Where it goes: the AI Lab 2 paragraph, and the Service description in JSON-LD.

AI Lab schema and internal links

- **Schema:** Service (name "Agentic AI Development", serviceType "Agentic AI for financial services") with an OfferCatalog of the five products.
- **Card 5:** link "Private model training" to /alpha.
- **Tile 4:** link "Analytics Desk" to /analytics.
- **Hero button 1:** jump to the product suite with an on-page anchor (#products).

Proprietary Alpha (/alpha)

Proprietary Alpha keeps its brand name but now pairs it with the plain search term, "private AI model for investment firms". Absolute claims become checkable ones.

Alpha 1. Hero

Image — Live Proprietary Alpha hero, 19 Oct 2026

Block: Page hero: eyebrow, two-tone H1, paragraph, two buttons.

SEO metadata

- Primary keyword: private AI model for investment firms
- Secondary keywords: custom AI trained on proprietary data, AI asset screening, investment decision AI
- Title tag (53 characters): Private AI Models for Investment Firms | Gyanasarathi
- Meta description (145 characters): Proprietary Alpha trains a private AI model on your trades, valuation models and risk rules, isolated from other clients. Request a private demo.

Element	Live	New	Why
Eyebrow	PROPRIETARY ALPHA: CUSTOM AI MODELS	Keep	Brand name plus plain keyword.
H1, line 1	Your Investment Strategy.	Keep	Strong opener.
H1, line 2	Encoded Into a Sovereign AI That Thinks Like You Do.	Encoded Into a Private AI Model That Thinks Like You.	"Private AI model" is the search term.
Body	A secure, isolated AI environment that transforms your historical trades, valuation frameworks, and risk parameters into a custom model built on your institutional logic.	We train a private AI model on your historical trades, valuation frameworks and risk limits in an isolated environment. It then applies your logic to every new asset.	Leads with what we do and why it matters.

Element	Live	New	Why
Buttons	Request a Private Demonstration / Speak Directly With an AI Architect	Keep	Clear as is.

Alpha 2. The concept

Image — Live Proprietary Alpha concept block, 19 Oct 2026

Block: Two columns: flow diagram on the left; eyebrow, H2, paragraph and four bullets on the right.

Element	Live	New	Why
Diagram, top	SECURE CLIENT DATA UPLOAD / Trades, Models, Research	Keep	Clear as is.
Diagram, middle line	Behavioral Pattern & Logic Synthesis	Learns Your Decision Logic	Plain words for the same step.
Diagram, bottom label	SOVEREIGN INTELLIGENCE OUTPUT	CLIENT-OWNED MODEL OUTPUT	States ownership plainly.
Eyebrow	THE CONCEPT	Keep	Clear as is.
H2	Your Competitive Edge, Encoded and Scaled	Keep	Strong and accurate.

Element	Live	New	Why
Body	Your decision history becomes your edge. We train a private AI on your trades, valuation models, and risk rules to create a sovereign system that scales your analytical logic across assets without exposing your methodology.	Use the Proprietary Alpha answer capsule below	A definition AI answers can quote; about a third longer, and the column has room beside the diagram.
Bullet 1	Private, sovereign AI model trained on your proprietary data	Private AI model; your data trains no other client's model	Answers the real security question: does my data train anyone else's model?
Bullets 2 to 4	Learns behavioral patterns... / Scales your firm's decision-making logic... / Fully isolated environment...	Keep	Specific and accurate.

Alpha 3. Process

Image — Live Proprietary Alpha process, 19 Oct 2026

Block: 4-step process strip with icons.

Element	Live	New	Why
Eyebrow	THE PROCESS	Keep	Clear as is.
H2, line 1	From Your Data to Your Sovereign AI	From Your Data to Your Private AI Model	One term across the page.
H2, line 2	How Proprietary Alpha Works	Keep	Matches "how does it work" questions.

Element	Live	New	Why
Step 1	Secure Data Submission / Upload trades, models, and risk frameworks via our encrypted portal.	Keep [confirm the encrypted portal is live]	Accurate if the portal exists.
Step 2	Isolated Environment Setup / A fully private AI training instance where your data remains exclusively yours.	Keep	Clear as is.
Step 3 title	Behavioral Model Training	Training and Back-Testing	Shows the model is tested before it is trusted.
Step 3 body	Our architects train a bespoke AI on your data, learning your firm's exact evaluation patterns.	We train the model on your past decisions, then test it on held-out deals your team has already scored.	Testing on held-out deals is how model-risk teams validate a model.
Step 4 title	Sovereign AI Deployment	Private Model Deployment	One term across the page.
Step 4 body	Your private engine is deployed, ready to scale your analytical capacity.	It goes live in a dedicated, isolated environment and screens new assets your way. [confirm hosting model]	Says where it runs and what it does.

Alpha 4. Differentiators

Image — Live Proprietary Alpha differentiator cards, 19 Oct 2026

Block: 6-card grid (two rows of three).

Element	Live	New	Why
Eyebrow	DIFFERENTIATORS	Keep	Clear as is.
H2	Six Reasons Proprietary Alpha Outperforms Generic AI Tools	Six Reasons to Choose a Private AI Model Over Generic Tools	"Outperforms" is a performance claim you would need to prove.
Card 1 title	Complete Data Isolation by Architecture	Keep	Clear and specific.
Card 1 body	Every client model lives in its own secured compute environment. There is no shared infrastructure, no co-mingled data, and no risk of your analytical frameworks being exposed.	Each client model runs in its own secured compute environment, with no shared infrastructure and no co-mingled data, so your frameworks stay yours.	Drops "no risk", an absolute no security team accepts.
Card 2 title	Deep Behavioral Pattern Learning	Learns Your Decision Weightings	Says what is learned.
Card 2 body	The model learns how your firm thinks, internalizing the subtle weightings and thresholds embedded in your investment decisions.	The model learns the weightings and thresholds behind your past investment decisions, including the deals you passed on.	Passed deals are training data most firms overlook.
Card 3 title	Institutional Knowledge at Computational Scale	Keep	Clear as is.
Card 3 body	The subjective expertise of your senior analysts is translated into reproducible intelligence that scales across thousands of opportunities without dilution.	Your senior analysts' judgment becomes a reproducible screen that applies the same standard to every opportunity.	Plain and concrete.

Element	Live	New	Why
Card 4 title	Sub-Second Asset Screening at Massive Scale	Asset Screening in Seconds, Not Weeks [confirm]	Plain speed claim; confirm the typical screening time.
Card 4 body	Apply your firm's exact investment criteria to thousands of assets simultaneously. Analyze in seconds what used to take weeks.	Apply your exact investment criteria to thousands of assets at once and get a ranked shortlist in seconds.	Names the output: a ranked shortlist.
Card 5 title	Full Sovereign Ownership of Your Model	Full Ownership of Your Model	Plainer.
Card 5 body	You own your trained intelligence system outright. We architect it, but the model, outputs, and intellectual property belong entirely to you.	You own the trained model outright. We build it; the model, its outputs and the intellectual property belong to you.	Same promise, fewer words.
Card 6 title	Continuous Model Learning and Improvement	Keep	Clear as is.
Card 6 body	As you make new decisions, the model is retrained to incorporate them, ensuring your sovereign AI evolves alongside your methodology.	Each new decision feeds a scheduled retraining cycle, so the model keeps pace as your methodology evolves.	"Scheduled" sets a realistic expectation.

Alpha 5. ROI and who it is for

Image — Live Proprietary Alpha ROI and deployments, 19 Oct 2026

Block: Two columns: ROI card with checklist on the left; eyebrow, H2 and audience chips on the right.

Element	Live	New	Why
ROI title	The ROI Engine	Keep	Short and clear.
ROI body	When your institutional knowledge becomes computational capital, the return on intelligence is transformational.	The return: analyst hours saved, and your best judgment applied to every deal, not only the ones your team has time for.	Names where the return comes from.
Check 1	Faster asset screening algorithms	Faster screening of new opportunities	The benefit, not the algorithm.
Check 2	Improved decision accuracy over time	Accuracy tracked against your own history	Measurable instead of promised.
Check 3	Absolute elimination of repetitive research tasks	Fewer repetitive research tasks	"Absolute elimination" is not credible.
Check 4	Scalable application of institutional knowledge	One standard applied by every analyst	A concrete outcome.
Eyebrow	DEPLOYMENTS	BUILT FOR	Use "Deployments" only if these client types already use it [confirm].
H2	Who Uses Proprietary Alpha	Who Proprietary Alpha Is For	Accurate before you can name deployments.
Chips	Hedge Funds / Private Equity Firms / Family Offices / Institutional Investors / Asset Managers	Private Equity Sponsors / Hedge Funds / Family Offices / Sovereign Wealth Funds / REIT Asset Managers	Matches the target audience; "institutional investors" is too broad to rank for.

Alpha 6. Call to action

Image — Live Proprietary Alpha CTA, 19 Oct 2026

Block: CTA banner: two-line H2, paragraph, two buttons.

Element	Live	New	Why
H2	Your Investment Philosophy Deserves More Than Spreadsheets	Keep	Strong and specific.
Body	Join a select group answering the AI imperative by encoding their competitive edge into a private, sovereign AI model. Onboarding is confidential and led by our AI architects.	Encode your firm's investment logic into a private AI model you own. Onboarding is confidential, covered by an NDA, and led by our AI architects.	Direct; drops the unverifiable "select group".
Buttons	Begin Private Onboarding / Request an Architecture Consultation	Keep	Clear as is.

Proprietary Alpha answer capsule

Question it answers: What is Proprietary Alpha?

> Proprietary Alpha is Gyanasarathi's private AI model service for investment firms. It trains a model on a firm's past trades, valuation models and risk rules in an isolated environment. The model then screens thousands of assets the way the firm would. The client owns the model and its outputs.

Where it goes: the Concept paragraph (Alpha 2), and the Service description in JSON-LD.

Proprietary Alpha schema and internal links

- **Schema:** Service ("Proprietary Alpha", serviceType "Private AI model training for investment firms") with an audience listing the five client types.
- **Hero body:** link "valuation frameworks" to /analytics.
- **CTA body:** link "AI architects" to /about.
- **Card 1:** link "secured compute environment" to /ai-lab, where the deployment model is described.

Research and Insights (/research)

Research is the page AI assistants most want to cite. Today, no report, framework or insight on it has its own URL, and the buttons open nothing. The copy below works best once each piece is published at its own address.

Research 1. Hero

Image — Live Research hero, 19 Oct 2026

Block: Page hero: eyebrow, two-tone H1, paragraph, two buttons.

SEO metadata

- Primary keyword: real estate and capital markets research
- Secondary keywords: WACC model template, due diligence checklist, cap rate analysis, LP capital flows, AI in investment banking
- Title tag (55 characters): Real Estate and Capital Markets Research | Gyanasarathi
- Meta description (151 characters): Macro reports, cap rate analysis and downloadable modeling templates for capital allocators, plus research on AI in finance. Browse the Research Vault.

Element	Live	New	Why
Eyebrow	RESEARCH & INSIGHTS	RESEARCH AND INSIGHTS	Matches the nav label.
H1, line 1	Where Institutional Research	Capital Markets Research	The primary keyword in the H1.
H1, line 2	Becomes Strategic Advantage.	for Real Estate Investors.	Names the audience.

Element	Live	New	Why
Body	Not a general blog structured frameworks, macro deep dives and intelligence reports for institutional decision-makers, designed to inform decisions, protect positions and identify opportunities.	Not a general blog. Structured frameworks, macro deep dives and research reports for capital allocators, built with the same methods we use on client mandates.	Fixes the run-on and says why the research is credible.
Buttons	Browse the Research Vault / Download Institutional Frameworks	Keep, once the downloads work	A download button that does nothing costs trust.

Research 2. Intelligence system

Image — Live Research intro section, 19 Oct 2026

Block: Centered H2, paragraph and four topic tiles.

Element	Live	New	Why
H2	This Is Not a Newsletter. This Is an Intelligence System.	Keep	Distinctive and clear.

Element	Live	New	Why
Body	Our Research Vault is a structured intelligence system built for capital allocators and senior decision-makers. Every report and analysis here uses the same methodologies deployed in active client mandates. We don't publish for reach--we publish for relevance.	Use the Research answer capsule below	A definition AI answers can quote, about 30% longer.
Tiles	Structured Financial Research / Decision Frameworks / Macro Market Intelligence / Institutional Insights	Modeling Frameworks / Macro Research / Real Estate Analysis / AI in Finance	Topic names people search; each can become a category page.

Research 3. Frameworks

Image — Live Research framework cards, 19 Oct 2026

Block: 5 download cards (3, then 2) with badge, title, paragraph and button.

Element	Live	New	Why
Eyebrow	STANDARDIZED ACCESS	DOWNLOADABLE FRAMEWORKS	Says what the reader gets.
H2	Proprietary Frameworks Deployed in Global Mandates	Modeling Frameworks Used on Live Mandates	Keyword first; "live mandates" is the proof point.
Side note	Proprietary structural templates deployed in active global mandates.	Templates for valuation, diligence and reporting.	No longer repeats the H2.

Element	Live	New	Why
Card badges	FRAME	XLSX [confirm; use PDF for any PDF file]	Tells the reader the file format.
Card 1 title	Capital Structure Optimization Framework	WACC and Capital Structure Model	"WACC model" is a common search.
Card 1 body	XLSX-based model for WACC forecasting, capital stack analysis, and optimal debt-to-equity structuring.	Excel model for WACC, capital stack analysis and debt-to-equity sizing.	Shorter, same scope.
Card 2 title	Due Diligence Standardization Framework	40-Point Due Diligence Checklist	The number and the format are the hook.
Card 2 body	A complete 40-point diagnostic checklist to standardize M&A, equity placement, and due diligence.	A standard checklist for M&A, equity placement and real estate due diligence.	Adds the primary niche.
Card 3 title	Energy and Infrastructure Valuation Templates	Keep	Already specific.
Card 3 body	Valuation templates for long-duration energy assets and infrastructure, including phased waterfall distribution models.	Templates for long-duration energy and infrastructure assets, with phased LP/GP waterfall distributions.	Uses the searched term "LP/GP waterfall".
Card 4 title	Asset Management KPI System	Asset Management KPI Dashboard	Says what it is.
Card 4 body	Executive reporting framework with pre-built KPI dashboards and yield tracking modules for asset management teams.	Pre-built KPI dashboards with yield, occupancy and budget-versus-actual tracking for asset managers.	Names the KPIs.

Element	Live	New	Why
Card 5 title	Risk Assessment Framework Architecture	Portfolio Stress-Test Framework	A plain name for the task.
Card 5 body	Probabilistic mapping protocols and scenario modeling tools to stress-test portfolios and quantify downside risk.	Scenario and probability tools that stress-test a portfolio and size its downside risk.	Plainer.
Card buttons	Download Framework	Keep, and give each framework its own page with the download	A page per template can rank for its own search, such as "WACC model template".

Research 4. Macro research and AI in finance

Image — Live Research macro list and AI card, 19 Oct 2026

Block: Two columns: report list with dates on the left, dark topic card on the right.

Element	Live	New	Why
H3	Macro Market Intelligence	Macro and Real Estate Research	Adds the niche.
Subline	Depth equivalent to a dedicated Wall Street research desk, structured specifically for capital allocators.	Views on capital flows, interest rates and cap rates, written for capital allocators.	Replaces an unprovable comparison with the topics covered.

Element	Live	New	Why
Report rows (5)	Global Capital Flow Analysis: Structural Shifts in Q1 2026 (Q1 2026) through LP Capital Flows: Institutional Allocation Shifts Across Markets (SEP 2025)	Keep the titles, and publish each as a full article at its own URL	Strong titles, but they open nothing. The newest is dated Q1 2026, so add a fresh piece or drop the dates.
Card title	At the Crossroads of AI & Finance	Keep	Clear as is.
Card subline	Forward-looking thought leadership exploring the bleeding edge of intellectual automation.	Practical research on where AI changes financial analysis, and where it does not.	Balanced claims read as expertise.
Topic 3	Algorithmic Research Acceleration & Financial Analysis	Using AI Agents to Speed Up Financial Research	Reads like a question someone would ask.
Topics 1, 2, 4, 5	How Generative AI Is Reshaping Investment Banking / Deterministic Automation in M&A Due Diligence / Large Language Models in Practical Financial Modeling / The Future Belongs to AI-Augmented Analysts	Keep, each with its own article page	Good, searchable titles.

Research 5. Featured insights

Image — Live Research featured insights, 19 Oct 2026

Block: 3 article cards with category, title, summary and link.

Element	Live	New	Why
Eyebrow	LATEST INTELLIGENCE	LATEST RESEARCH	Plainer.
H2	Featured Insights	Keep	Clear as is.
Card 1 summary	While standard dashboards report what happened, sovereign AI agents dictate what to do. Examining the shift toward autonomous financial intelligence.	Dashboards report what happened; AI agents recommend what to do next. What changes when analysis becomes autonomous, and what must stay human.	"Recommend" keeps people in charge, which institutions expect.
Card 2	Capital Constraints & Financing Gaps in European Real Estate, with its summary	Keep	Specific and well framed.
Card 3 summary	As trading velocity increases, institutional API architecture is undergoing a structural shift toward zero-trust streaming to secure massive surfaces.	As trading speeds rise, institutional APIs are moving to zero-trust streaming to secure a growing attack surface.	Fixes "massive surfaces".
Card links	Read Insight	Keep, linked to each article's own URL	The link is what lets crawlers reach the article.

Research 6. Subscribe

Image — Live Research subscribe banner, 19 Oct 2026

Block: CTA banner: two-line H2, paragraph, two buttons.

Element	Live	New	Why
H2, line 1	Stay at the Frontier of	Keep	Clear as is.
H2, line 2	Institutional Intelligence	Real Estate and AI Research	Says what readers subscribe to.
Body	Subscribe to receive fresh frameworks, macro reports, and AI insights. Designed exclusively for institutional decision-makers and capital allocators.	Subscribe for new frameworks, macro reports and AI research, written for institutional decision-makers and capital allocators.	One sentence, no "exclusively".
Buttons	Subscribe to Research Updates / Request Full Research Access	Keep	Clear as is.

Research answer capsule

Question it answers: Where can I find institutional real estate research and modeling templates?

> The Gyanasarathi Research Vault publishes macro reports, real estate cap rate and capital flow analysis, and research on AI in finance for capital allocators. Downloads include a WACC model, a due diligence checklist and infrastructure templates with LP/GP waterfalls. Each piece uses the methods Gyanasarathi applies on live client mandates.

Where it goes: the Research 2 paragraph, and the CollectionPage description in JSON-LD.

Research schema and internal links

- **Schema:** CollectionPage with an ItemList of the articles. Each article page gets Article markup with the founder as author and Gyanasarathi as publisher; each framework page gets CreativeWork with its file format.
- **Framework cards:** link each title to its own page, and the Card 3 "LP/GP waterfall" mention to /analytics.

- **AI topics:** link "Large Language Models in Practical Financial Modeling" to /ai-lab from inside the article.
- **Footer:** list the Research Vault under Insights (Home 9).

Contact (/contact)

Contact pages rank on the brand name. The work here is consistency: one response promise, one CTA name, the right email domain and the location rule.

Contact 1. Hero

Image — Live Contact hero, 19 Oct 2026

Block: Page hero: eyebrow, three-line H1, paragraph.

SEO metadata

- Primary keyword: contact Gyanasarathi
- Secondary keywords: hire a financial modeling consultant, CRE underwriting support, AI integration consultation
- Title tag (58 characters): Contact Gyanasarathi | Book a Modeling or AI Strategy Call
- Meta description (140 characters): Share your mandate and a specialist replies within two business hours. Confidential by default, for modeling, due diligence and AI projects.

Element	Live	New	Why
Eyebrow	START A CONVERSATION	Keep	Clear as is.
H1	Your Mandate Deserves a Purpose-Built Response. Not a Generic Reply.	Keep	On brand; the title tag carries the keyword.

Element	Live	New	Why
Body	At GyanSarathi, Every inquiry goes to the right specialist with responses within two business hours substantive not sales-driven.	At Gyanasarathi, every inquiry goes straight to a specialist, with a substantive reply within two business hours [confirm]. No sales scripts.	Fixes the capitalization and run-on; one response promise sitewide.

Contact 2. Form and why us

Image — Live Contact form and reasons, 19 Oct 2026

Block: Two columns: inquiry form on the left; H2, paragraph, three reason cards and contact card on the right.

Element	Live	New	Why
Form H2	Schedule Your Strategy Session	Book Your Strategy Call	Matches the primary CTA name.
Form intro	Share your mandate and we'll connect you with the right specialist within two hours. All inquiries are fully confidential.	Share your mandate and a specialist will reply within two business hours. Every inquiry is confidential.	Matches the hero promise exactly.
Email label	INSTITUTIONAL EMAIL ADDRESS	WORK EMAIL	Shorter, standard form label.

Element	Live	New	Why
Other labels	FIRST NAME / LAST NAME / ORGANIZATION OR FUND NAME / PRIMARY MANDATE (SELECT ONE) / DESCRIBE YOUR CURRENT CHALLENGE OR OBJECTIVE	Keep	Clear as is.
Dropdown options (7)	Multi-Industry Valuation and Financial Modeling / M&A Due Diligence and Risk Analysis / Proprietary AI Model Training / AI Lab Products and API Integration / Research Access and Frameworks / Executive Consultation and Strategy / Other Inquiry	Real Estate Financial Modeling / Valuation (DCF, LBO, Comps) / M&A Due Diligence / Agentic AI and Automation (AI Lab) / Private AI Model (Proprietary Alpha) / Research and Frameworks / Other	Mirrors the service names, so every lead arrives tagged to a page.
Button	Send My Strategy Request	Keep	Clear as is.
Right H2	Why Serious Institutions Choose GyanSarathi	Why Investment Teams Choose Gyanasarathi	Names the audience; brand spelling.

Element	Live	New	Why
Right body	At GyanSarathi, you speak directly with the specialist doing the work no sales layers or intermediaries. Every engagement starts with a direct, expert level conversation.	Use the Contact answer capsule below	About 75% longer; the right column is shorter than the form, so it absorbs the two extra lines.
Card 1 title	2-Hour Response Commitment	Two-Business-Hour Response	Matches the promise everywhere else.
Card 1 body	Every inquiry gets a direct, specialist response within two hours no automation, no generic replies.	Every inquiry gets a direct reply from a specialist within two business hours. No auto-responders.	Fixes the run-on.
Card 2 title	Institutional Confidentiality by Default	Keep	Clear as is.
Card 2 body	Every inquiry is handled with strict confidentiality, under NDA principles from the first conversation and formalized before any detailed discussion.	Every inquiry is confidential from the first message, and we sign an NDA before any detailed discussion.	Plainer and more specific.
Card 3	Mandate-Scoped Onboarding Session, with its paragraph	Keep	Clear and specific.
Contact card label	STRATEGIC INQUIRIES	Keep	Clear as is.
Email	support@gayan-sarathi.com	contact@gyanasarathi.com [confirm]	Matches the site domain.

Element	Live	New	Why
Location line	Global operations across USA, Europe, Middle East & Australia. Remote-first infrastructure operating 24/7.	Hybrid team with hubs in India, serving clients worldwide across time zones.	Follows the location rule; drops "24/7".

Contact answer capsule

Question it answers: How do I engage Gyanasarathi?

> To engage Gyanasarathi for financial modeling, due diligence, agentic AI or a private AI model, share your mandate through the contact form or by email. A specialist replies within two business hours, confidentiality applies from the first message, and work starts after a scoped onboarding session.

Where it goes: the right-column paragraph (Contact 2), and the ContactPage description in JSON-LD.

Contact schema and internal links

- **Schema:** ContactPage, plus a contactPoint on the Organization (email, contactType "sales", areaServed "Worldwide").
- **Dropdown:** each option matches a service page, so the form can pre-select it when a CTA on /analytics, /ai-lab or /alpha sends the visitor here.
- **Thank-you message:** link to /research so new leads can read the frameworks while they wait.

Schema (JSON-LD to paste)

Paste the first block into the head of every page: it tells search engines and AI models who the firm is, what the site is and who leads it. Add the second block, adapted, on /analytics, /ai-lab and /alpha. Replace every [bracketed] value first.

Sitewide block (Organization, WebSite, Person):

```
{
  "@context": "https://schema.org",
  "@graph": [
    {
      "@type": "Organization",

```

Service block for /analytics:

```
{
  "@context": "https://schema.org",
  "@type": "Service",
  "@id": "https://gyanasarathi.com/analytics#service",
  "name": "Real Estate Financial Modeling",
  "serviceType": "Financial modeling and underwriting",
  "description": "Gyanasarathi's Analytics Desk provides institutional real estate financial modeling. It covers acquisition underwriting, development pro formas, DCF and LBO valuation, and LP/GP waterfall models with preferred return, catch-up and promote tiers. Analysts build every model, AI agents check every input, and each file is documented for investment committee review.",
  "url": "https://gyanasarathi.com/analytics",
  "provider": {
    "@id": "https://gyanasarathi.com/#organization"
  },
  "areaServed": "Worldwide",
  "hasOfferCatalog": {
    "@type": "OfferCatalog",
    "name": "Analytics Desk services",
    "itemListElement": [
      {
        "@type": "Offer",
        "itemOffered": {
          "@type": "Service",
          "name": "Valuation and DCF Modeling"
        }
      },
      {
        "@type": "Offer",
        "itemOffered": {
          "@type": "Service",
          "name": "M&A Due Diligence and Risk Analysis"
        }
      },
      {
        "@type": "Offer",
        "itemOffered": {
          "@type": "Service",
          "name": "Asset Management and Investor Reporting"
        }
      },
      {
```

```
        "@type": "Offer",
        "itemOffered": {
          "@type": "Service",
          "name": "Executive Dashboards and Market Intelligence"
        }
      }
    ]
  }
}
```

To adapt the Service block:

- **/ai-lab:** name "Agentic AI Development", serviceType "Agentic AI for financial services", the AI Lab capsule as description, and the five AI Lab products as offers.
- **/alpha:** name "Proprietary Alpha", serviceType "Private AI model training for investment firms", the Proprietary Alpha capsule as description, plus an audience of type BusinessAudience listing the five client types.

Page block, one per inner page. Use @type AboutPage on /about, CollectionPage on /research and ContactPage on /contact. Use WebPage on /analytics, /ai-lab and /alpha, and add "mainEntity" pointing to that page's #service id. The description is that page's answer capsule:

```
{
  "@context": "https://schema.org",
  "@type": "AboutPage",
  "@id": "https://gyanasarathi.com/about#webpage",
  "url": "https://gyanasarathi.com/about",
  "name": "About Gyanasarathi | CRE Modeling Meets Agentic AI",
  "description": "[this page's answer capsule]",
  "isPartOf": {
    "@id": "https://gyanasarathi.com/#website"
  },
  "about": {
    "@id": "https://gyanasarathi.com/#organization"
  }
}
```

BreadcrumbList, one per inner page (change position 2 to match the page):

```
{
  "@context": "https://schema.org",
  "@type": "BreadcrumbList",
  "itemListElement": [
    {
      "@type": "ListItem",
      "position": 1,
      "name": "Home",
      "item": "https://gyanasarathi.com/"
    },
    {
      "@type": "ListItem",
      "position": 2,
      "name": "Analytics Desk",
      "item": "https://gyanasarathi.com/analytics"
    }
  ]
}
```

Validate every block in the Schema Markup Validator (validator.schema.org). Google's Rich Results Test only reports the types it shows as rich results, such as Organization. Leave Review and AggregateRating out entirely.

Developer checklist

Do items 1 to 4 before publishing the new copy; until then, crawlers cannot reach most of it.

- [ ] 1. Stop the 404s now: add the SPA fallback below to the .htaccess file in public_html (Hostinger runs LiteSpeed, which reads .htaccess). Every route then returns HTTP 200, and Google can render it.
- [ ] 2. Prerender all 7 routes at build time with a maintained Vite prerender plugin, so each page's HTML contains its copy. Output flat files (about.html), then swap the fallback for the second .htaccess block below. Check with View Source, not DevTools.
- [ ] 3. Give each route its own title tag, meta description, canonical URL and Open Graph tags, taken from its hero block.
- [ ] 4. Upload robots.txt and sitemap.xml (below), then submit the sitemap in Google Search Console and Bing Webmaster Tools.

- [ ] 5. Add a 404.html page to the build; the second .htaccess block returns it with a real 404 status.
- [ ] 6. Add the JSON-LD from the Schema section.
- [ ] 7. Keep one H1 per page; the wordmark and footer logo become plain text.
- [ ] 8. Spell the brand "Gyanasarathi" in all copy, alt text and emails; switch the email address once the mailbox is confirmed.
- [ ] 9. Replace the shared footer copy (Home 9); one change fixes all 7 pages.
- [ ] 10. Hide the testimonial block until real, permissioned quotes exist.
- [ ] 11. Ship one copy of the ticker text in the HTML; create the repeats in the animation code, marked aria-hidden="true".
- [ ] 12. Point every button at a real destination or remove it: Learn More, Download Framework, Read Insight, Access your Client Portal, Access the Developer Portal.
- [ ] 13. Publish each research report, AI topic and framework at its own URL, with Article or CreativeWork markup.
- [ ] 14. Remove maximum-scale=1.0 and user-scalable=no from the viewport meta tag so visitors can zoom.
- [ ] 15. Re-test: each URL returns 200 without a redirect, View Source shows the page's copy, and the Schema Markup Validator reads the JSON-LD.

Item 1, .htaccess (now):

```
<IfModule mod_rewrite.c>
  RewriteEngine On
  RewriteBase /
  RewriteRule ^index\.html$ - [L]
  RewriteCond %{REQUEST_FILENAME} !-f
  RewriteCond %{REQUEST_FILENAME} !-d
  RewriteRule . /index.html [L]
</IfModule>
```

Item 2, .htaccess after prerendering (replaces the block above):

```
<IfModule mod_rewrite.c>
  RewriteEngine On
  RewriteCond %{REQUEST_FILENAME} !-f
  RewriteCond %{REQUEST_FILENAME} !-d
  RewriteCond %{REQUEST_FILENAME}.html -f
  RewriteRule ^(.+)$ /$1.html [L]
</IfModule>
ErrorDocument 404 /404.html
```

Item 4, robots.txt:

```
User-agent: *
Allow: /

Sitemap: https://gyanasarathi.com/sitemap.xml
```

Item 4, sitemap.xml:

```
<?xml version="1.0" encoding="UTF-8"?>
<urlset xmlns="http://www.sitemaps.org/schemas/sitemap/0.9">
  <url><loc>https://gyanasarathi.com/</loc></url>
  <url><loc>https://gyanasarathi.com/about</loc></url>
  <url><loc>https://gyanasarathi.com/analytics</loc></url>
  <url><loc>https://gyanasarathi.com/ai-lab</loc></url>
  <url><loc>https://gyanasarathi.com/alpha</loc></url>
  <url><loc>https://gyanasarathi.com/research</loc></url>
  <url><loc>https://gyanasarathi.com/contact</loc></url>
</urlset>
```
